

You'll find something of interest by going to: www.rsc.org/Thevitalingredient, by becoming one of more than 4,200 members **ChemNet** and when you visit the **Chemistry Centre** at the RSC's headquarters, Burlington House, Piccadilly – due to be opened later this year.

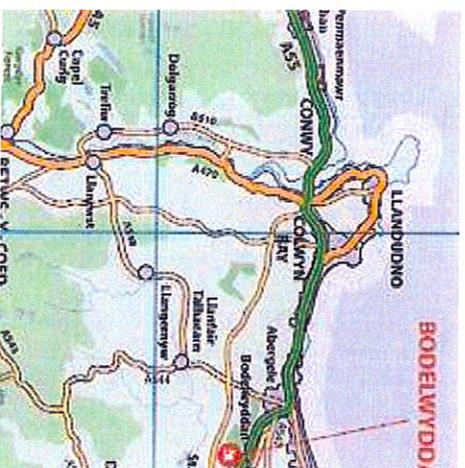

The North Wales Section Committee of the Royal Society of Chemistry is grateful to the staff of Bodelwyddan Castle Trust for their help in organising this event.

How to get there

Bodelwyddan Castle and its associated Warner Hotel are easily reached from the **A55 westbound from Chester or eastbound from Bangor**. Watch out for the brown signage at the approach to **Junction 25** from either direction.

Westbound: there is a slip road that leads to a roundabout. To the left of the roundabout is the gateway to the Castle.

Eastbound: the slip road runs up to a roundabout. Take the first exit, cross the bridge over the dual carriageway and at the next roundabout take the second exit, which leads to the Castle gateway.

RSC | Advancing the
Chemical Sciences

**BODELWYDDAN
CASTLE**

**Social Event for
RSC Members and
their partners**

Saturday May 23rd 2009

**Bodelwyddan Castle,
Denbighshire LL18 5YA**

from 11.00am onward
to include talk at 2.30pm

**“ Heritage Conservation: from
Michael Faraday to Japanese wallpaper”**

*by Katharine St. Paul,
Curator of Collections at
the Royal Institution, London.*

Bodelwyddan Castle is a magnificent Victorian Country House situated in beautiful parkland. The Castle offers a great family day out with something for everyone, including Victorian Games Room, Interactive Exhibits, Castle Gift Shop, Caffi Castell, Adventure Playground, Garden Maze, Gardens and Extensive Woodland Walks.

About the speaker

Katharine St. Paul is Curator of Collections at the Michael Faraday Museum, the Royal Institution.

Katharine graduated from De Montfort University in Lincoln in 1997 with a degree in Conservation and Restoration Studies. She became Collections Assistant working on the Reserve Collection of the National Museum of Science and Industry in London. She was then Collections Manager at the British Dental Association Museum before moving to the Royal Institution as Curator for Collections where she has been heavily involved with a major refurbishment programme, including a new exhibition space and conservation of the collection and architecture.

The Royal Institution's iconic collections include the earliest miners' lamps made by Humphry Davy, the first electric transformer and generator made by Michael Faraday and a model of the first enzyme to have its structure determined by Lawrence Bragg's X-ray crystallography team.

Please note: the talk will begin at 2.30 pm in the Sculpture Gallery within the Castle.

Seating is limited and will be allocated on a first-come, first-served basis.

Charges for Members

(available at RSC registration desk)

| | |
|--|--------------|
| Admission to Grounds, Gardens, Galleries and Woodland Walks. RSC Members & partners (p/p) | £4.00 |
