

2nd Australian Conference on Green and Sustainable Chemistry & Engineering

8-12 December 2024

Discover cutting-edge research, network with leading experts, and explore ground-breaking solutions for a sustainable future through green chemistry & engineering

An industry-focused day on Wednesday 11th December 2024 will facilitate industry, academia and government authorities to network, share information and identify opportunities

PLENARY SPEAKERS

John Warner
Technology
Greenhouse

Louise Reeves
Queensland Water
Directorate

Paul Anastas
Yale University

Qin Li
Griffith University

Doug MacFarlane
Monash University

Keynote speakers include

- ✓ Leonie Barner, Queensland University of Technology, Australia
- ✓ Damien Batstone, The University of Queensland, Australia
- ✓ Neil Cameron, Monash University, Australia
- ✓ Anna Chrobok, Silesian University of Technology, Poland
- ✓ Rebecca Goss, University of St Andrews, Scotland
- ✓ Silvia Gross, University of Padova, Italy
- ✓ Edward Kosior, Nextek Ltd, United Kingdom
- ✓ Adam Lee, Griffith University, Australia
- ✓ Nitesh Mehta, Newreka Green Synth Technologies, India
- ✓ Veena Sahajwalla, UNSW, Australia
- ✓ Kei Saito, Kyoto University, Japan
- ✓ Marco Sangermano, Politecnico di Torino, Italy
- ✓ John Thwaites, Circular Economy Ministerial Advisory Group, Australia

Sponsorship

Sponsorship opportunities are available
For more information visit our website

Conference themes

- ✓ Greener synthesis and catalysis
- ✓ Safe and sustainable green chemistry design
- ✓ Discarded resource valorisation
- ✓ Renewable chemical feedstocks and next generation green materials
- ✓ Green chemistry for sustainable manufacturing and resource management in all sectors (including life cycle analysis)
- ✓ Green chemistry education
- ✓ Corporate Social Responsibility (CSR) and Environmental, Social and Governance (ESG)
- ✓ Technology transfer/Commercialisation/Intellectual property
- ✓ Clean energy and storage
- ✓ Circular economy, green chemistry & relevant business models
- ✓ Green chemistry for mitigating environmental problems
