

Day of Science & Careers 2014

Monday 28 April 2014

IPA, 44 Belgrave Square, London SW1X 8PS

Day of Science & Careers 2014 is SCI's annual career event. The meeting is designed for Early Career People with a particular focus on providing information about the wide range of careers covered in the chemical, and chemical using, industries. You may be surprised to learn that over 70% of people working in these industries work in SMEs (small and medium enterprises), so there are lots of opportunities beyond the large organisations you may have heard of so far.

There will be a wide range of talks including:

- ▶ starting out in academia and in industry
- ▶ working in both bioscience and chemical SMEs
- ▶ careers in multinational bioscience companies
- ▶ working on a plant and in health and safety
- ▶ working in the petrochemicals industry
- ▶ working as a consultant
- ▶ tips on applying for that first job

Talks will follow the speakers' careers giving you a real sense of what it is like to work in these roles and industries.

At the end of the meeting there will be a chance to chat to all our speakers in an informal setting over a glass of wine, which will also be an excellent opportunity to network with fellow delegates. Lunch will also be provided.

This meeting is **FREE** and is open to all, both SCI members and non-members. Places are limited so early registration is advisable.

Book today!
