# 6th Green Chemistry & the Consumer Symposium

## Energy Efficiency for Green Consumer Products

Plus pre-symposium Masterclass  
and evening event

Organised in conjunction with UKERC, The Environment Agency and GlaxoSmithKline

15-16 June 2009  
The King's Manor, York, UK

The Green Chemistry and the Consumer annual symposia bring together a diverse audience of representatives from consumer product supply chains, academics, NGOs, government, trade associations, media and other stakeholders to learn about green chemistry solutions for sustainable product supply chains.

### Programme of Activities

#### Masterclass (June 15th)

This pre-symposium event will provide training in establishing sustainable supply chains for greener products. It will introduce the principles and tools available to help in product development and will also highlight the opportunities for "greener" products. The event is targeted at representatives from the whole supply chain, from raw materials providers through to manufacturers, retailers and consumers, and is intended as a forum and opportunity for networking and business development.

#### Evening Event (June 15th, 5:30 - 7:30pm)

This will feature a plenary lecture given by **Roy Miller, Chemicals Advisor, B&Q Social Responsibility** as well as an exhibition and wine reception providing an opportunity for networking.

#### GC&C Symposium (June 16th)

The sixth symposium, '**Energy Efficiency for Green Consumer Products**', will explore recent advances in the field, including case studies on successful methods developed by industry and challenges in practice. The programme for the day will consist of a blend of both presentations and breakout sessions. Speakers will be announced shortly.

The symposium will conclude with a wine reception providing another opportunity for networking.

#### The Venue

The King's Manor in York is a group of medieval buildings that are one of historic York's most attractive sites and served the Tudors and Stuarts as a seat of government.
