

# Keele Inorganic Symposium

## 25/05/2023

Keele University invites you to join us for our symposium celebrating inorganic chemistry. The meeting will showcase a range of exciting chemistry, spanning organometallic main group synthesis, computational design of novel organometallic complexes for mechanistic understanding, and new synthetic routes to III-V quantum dots. Our speakers will be from a range of career stages, with a plenary lecture delivered by Prof Doug Stephan (University of Toronto) as part of his Royal Society of Chemistry Centenary Award Lecture Tour.

There will be a poster session for ECRs including PhD students and postdoctoral research associates, with cash prizes for the best poster presentations generously sponsored by Royal Society of Chemistry journal Chemical Communications. Funding from industrial sponsors and Keele University has allowed us to make this registration free for all attendees.

Poster abstract deadline: Friday 21<sup>st</sup> April 2023

Registration deadline: Thursday 11<sup>th</sup> May 2023

if you have any further questions then please contact Sebastian Cosgrove ([s.cosgrove@keele.ac.uk](mailto:s.cosgrove@keele.ac.uk))
