

5 June 2015, Kyoto, Japan

Organic Chemistry Symposium

Royal Society of Chemistry Roadshow

Programme

10:00 - 10:10	Opening remarks by Jeanne Andres (Royal Society of Chemistry)
10:10 - 12:10	Chair: Daping Zhang
10:10 - 10:50	Synthesis of Natural Products Containing Benzannulated Spiroketal Margaret Brimble (University of Auckland)
10:50 - 11:30	A New Stage of Ni - Catalyzed Functionalization of C - H Bonds Naoto Chatani (Osaka University)
11:30 - 12:10	Flash presentations Asymmetric Reaction Space Created by Hydrogen and Halogen Atom Norie Momiyama (Institute of Molecular Science) Exploration of Untapped Functionalities in Organocatalysis Takuya Hashimoto (Kyoto Univ.)
12:10 - 13:10	Lunch

13:10 - 15:10	Chair: Kathleen Too
13:10 - 13:50	Seeking Opportunities for C - H Functionalization Methods in Organic Synthesis Erik Sorensen (Princeton University)
13:50 - 14:30	Materials - and Biology - Oriented C - H Activation Kenichiro Itami (Nagoya University)
14:30 - 15:10	Flash presentations Effects of Salt Formation of Substrate on Asymmetric Hydrogenation of Isoquinolinium Salts Catalyzed by Dinuclear Iridium Complexes Yusuke Kita (Osaka University) Regiodivergent Copper - Catalyzed Aminoboration of Unactivated Terminal Alkenes Koji Hirano (Osaka University)
15:10 - 15:30	Coffee break
15:30 - 17:30	Chair: Keiji Maruoka
15:30 - 16:10	Collaborative Approach to C - H Functionalization Huw Davies (Emory University)
16:10 - 16:50	New Functions of Chirality - Switchable Helical Macromolecules Michinori Suginome (Kyoto University)
16:50 - 17:30	Publishing your research in high impact journals Richard Kelly & Hiromitsu Urakami
17:30	Closing remarks Keiji Maruoka (Kyoto University)
