

# Carbon Capture, Utilization & Storage (CCUS) Conference

Oct. 9 - 10, 2024 | Houston, TX

Attendee Information

Wood Mackenzie's Carbon Capture, Utilization and Storage (CCUS) 2024 Conference will bring together leaders from carbon emitting industries, policy, upstream players, financiers, EPCs, and midstream transportation, storage, and utilization providers to discuss the costs and economic feasibility of projects.

Taking place from October 9-10 at the Houston Marriott West Loop by The Galleria, Houston, TX, we will share different perspectives in the form of Wood Mackenzie insights, project case studies, panel discussions, debates and one to one conversations with the experts.

Platinum Sponsor

Gold Sponsors

Carbon Capture, Utilization and Storage (CCUS) is gaining pace as a buoyant project pipeline is attracting attention from leading companies. Momentum is growing but CCUS deployment remains well below what is required for achieving the net zero goals. At our 2023 event, the industry participants identified an urgent need to start building and move from plans to execution.

Agenda themes include:

- From plans to execution: What would it take to accelerate CCUS deployment?
- Funding CCUS projects: How to get investment decisions
- Connecting CO<sub>2</sub> sources to sinks: Is existing infrastructure available or is there a need to retrofit?
- Global CCUS market: The past, present and futuristic view
- CO<sub>2</sub> storage: Are there enough to capture global annual emissions?
- Is widespread, global CCUS inevitable? If so, why is the world under-investing?
- Capture to storage, are we ready? Updates on global storage pilot projects
- Location selection: How it interplays with community engagement
- Voluntary Carbon Market: Is it going to survive or is it just a fad?

25+  
Speakers

From across  
the CCUS  
value chain  
include:

Jennifer Stewart

Director Climate Policy,  
American Petroleum Institute

Edward Stones

Business Vice President, Energy  
and Climate, Dow
