Course "The A to Z's of Microbial Control, Monitoring, Validation and Troubleshooting of Pharmaceutical Water Systems" has been pre-approved by RAPS as eligible for up to 12 credits towards a participant's RAC recertification upon full completion.

Past Seminars**Course Outline: Day 1****Lecture 1:** What Makes Water Systems Have Microbial Quality Problems**Lecture 2:** Successful Sanitization Approaches for Trouble-Free Water Quality**Lecture 3:** Water System Validation by Logic Instead of Tradition**Lecture 4:** Implementing Changes to a Validated System**Lecture 5:** Reducing Water Microbial Excursions & Improving Investigations**Course Outline: Day 2****Lecture 6:** Understanding and Controlling Endotoxin**Lecture 7:** Harmonizing vs Optimizing Water Microbial Testing for System Quality Control**Lecture 8:** Microbial Enumeration Issues with High Purity Water Systems**Lecture 9:** Water System Investigation "How-To's" and Example Case Studies**Lecture 10:** What USP Does and Doesn't Say about PW, WFI, Pure Steam and Micro Issues**Overview:**

In order to understand the microbiology of a water system, one has to understand biofilms since that is the mode of microbial growth in a water system. There is much hype and fear about water systems biofilms by users and regulators alike who do not understand how they grow, how to effectively control that growth, or even how to monitor their presence. This course will help you understand how microorganisms respond to our efforts (or lack of effort) to control their numbers and even to how we try to count them.

Who Will Benefit:

- 1 Microbiology Laboratory Supervisors
- 1 Analysts Responsible for Water Sampling
- 1 Quality Assurance Personnel Responsible for Water System Deviation Management
- 1 Regulatory and Compliance Professionals
- 1 Process and Utility Engineers Responsible for Water System Maintenance, Troubleshooting, and Excursion Mitigation
- 1 Facility Engineers Responsible for Water System Design or Renovation
- 1 Validation Personnel for Qualification

Instructor Profile:

Teri C. Soli
Principal
Consultant, Soli
Pharma
Solutions

T.C. Soli, is a Ph.D., in Microbiology and President of Soli Pharma Solutions, Inc. Since becoming a full-time consultant, he has served consumer products and FDA-regulated industries with training and troubleshooting expertise. The areas he specializes in are water systems, sterilization, aseptic processing, microbiological and beta-lactam contamination control and microbiological laboratory operations. ...[more](#)

About GlobalCompliancePanel

GlobalCompliancePanel is an online knowledge fulfillment community portal & it has put together a new model for online compliance training by creating a single window of learning opportunities for compliance professionals & providing a

forum for expert speakers/panelists to render their services through simplified online training delivery mechanisms. Our commitment is give compliance regulatory training, showcasing of best industry practices & quality enrichment training sessions in a most cost effective manner. Compliance professionals can benefit from a wide range of training sessions, giving a diverse choice of events & all sessions being either Live or recorded stream or in the form of audio CDs. GlobalCompliancePanel portal ensures a secure & cost effective online environment and also support your E-learning and development on/through our website. Keep track of all webinars arranged for your industry through notifications & event calendars being mailed to your inbox. GlobalCompliancePanel opens new doors of learning opportunities for professionals.
