

# A GENERAL INTRODUCTION TO SMALL MOLECULE MASS SPECTROMETRY

Gain knowledge of the basic concepts of small molecule mass spectrometry over 2 days, including:

- Typical instrumentation
- Linking to modern separation techniques
- Principles of valid analytical measurement and instrument maintenance
- Spectral interpretation including fragmentation mechanisms
- Good quantitation practices

**COURSE CODE: PMZM00A**

**15<sup>TH</sup>-16<sup>TH</sup> APRIL 2020**

Register via: [nmsf.swan.ac.uk/services/training.php](https://nmsf.swan.ac.uk/services/training.php)

# CYFLWYNIAD CYFFREDINOL I SPECTROMETREG MÀS MOLECIWL BACH

Cael gwybodaeth am gysyniadau sylfaenol sbectrometreg  
màs moleciwl bach dros 2 ddiwrnod, gan gynnwys:

- Offeryniaeth nodweddiado
- Gan gysylltu â thechnegau gwahanu modern
- Egwyddorion dadansoddol dilys mesur a chynnal offeryn
- Dehongli sbectol gan gynnwys mecanweithiau darnio
- Arferion meintiol da

**COD CWRS: PMZM00A**

**15<sup>FED</sup>-16<sup>EG</sup> EBRILL 2020**
