Synopsis

This one day event will focus on recent developments in technology for the production and placing of asphalt.

Now, more than ever, clients, designers and producers face the challenge of delivering continuing improvements in performance, quality and value while minimising cost, energy consumption and environmental impact. For those involved in construction and maintenance with asphalt the capabilities and performance of the plant and equipment used in the production, placing and replacing of the material have a major bearing on success in achieving those outcomes.

The manufacturers of the machinery used by the asphalt industry have invested heavily and adopted, adapted and developed new technology to deliver products that meet the evolving needs of their users, often exceeding those immediate needs to offer options for improved materials and innovative ways of working.

Attendees

The SCI's Construction Materials Group has organised this event to provide an update on the improvements and benefits offered by some of the latest developments in asphalt plant and equipment. The conference will prove of interest to those who specialise in asphalt technology such as asphalt suppliers and contractors, highway and port authorities, road and engineering consultants, as well as university civil engineering departments.

Information on SCI

SCI is a forward-looking multidisciplinary membership organisation connecting industry, government and academia to advance the application of science for the benefit of society.

SCI offers a network of contacts spanning the chemical and chemical-using industries, together with a rolling programme of conferences, events and prestigious awards which help further knowledge and support those involved in the sector, no matter what stage they're at in their careers.

SCI is the publisher of many well respected peer-reviewed journals and industry leader Chemistry & Industry magazine (C&I).

Join SCI today to network with people across the chemical and chemical-using industries and make connections that spark innovation, get careers moving, and sets business ideas rolling. Visit www.soci.org/membership to find out more and join us.
