

April 11–12, 2011  
ISIS, University of Strasbourg

April 11th : 16.30–18.30  
April 12th : 9.00–12.30

# 2011 NJC Symposium

## New Directions in Chemistry

### PROGRAM

*Monday, April 11th*

16.30 Helen Hailes (University College London, UK)  
"The use of enzymes in synthesis"

17.10 Peter Junk (Monash University, Australia)  
"Rare earths as potential corrosion inhibitors"

17.50 Michael Scott (University of Florida, USA)  
"Design and synthesis of soft donor ligands for selective binding of harmful f-elements"

*Tuesday, April 12th*

9.00 Barbara Nawrot (Polish Academy of Sciences, Poland)  
"Chemically modified small inhibitory nucleic acids"

9.40 Wais Hosseini (University of Strasbourg, France)  
"Molecular turnstiles"

10.20 Fabrizia Grepioni (University of Bologna, Italy)  
"The growing world of crystal forms"

11.20 Odile Eisenstein (University of Montpellier, France)  
"Determining reaction mechanisms in organometallic chemistry with computational chemistry"

12.00 Jerry Atwood (University of Missouri-Columbia, USA)  
"New understanding of the organic solid state"
