

Royal Society of Chemistry Symposium

24-25 June, 2015
Cologne, Germany

Performance Chemicals
Personal Care
Agrochem
Pharma
Biocides

Right on Target

Sector Specific Formulation

Directed Delivery for
Performance Optimisation and Control

This two day international symposium organised by the Speciality Chemicals and the Formulation Science and Technology Groups of the RSC in association with The Knowledge Transfer Network will be held in conjunction with the 2015 Chemspec Europe and Chemsourc Exhibition organised by Quartz Chemicals. It will explore approaches to the control and targeting of chemical delivery to optimise the effectiveness of speciality chemicals in agrochem, biocide, performance chemical, personal care and pharma applications.

Attendance is free, and delegates will be able to pick and choose which lectures they attend

Programme includes: Development of Microcapsules as Additives for Advanced Composites, *Maxime Durka*, Devan Chemicals, Belgium; The Formulation Challenge of Designing Enhanced Biodelivery and Performance into Crop Protection Suspension Formulations, *Malcolm A. Faers*, Bayer CropScience AG, Germany; Investigation of Drug Release from Co-encapsulated Nanoparticles using Franz Diffusion Cells, *Mira Buhecha*, University of Brighton, UK; Core-shell Microcapsules from Day-stabilised Pickering Emulsions, *J. S. Phipps*, Imerys Minerals Ltd, UK; Structured Liquid Surfactant Systems For Personal Cleansing Applications, *Tony Gough*, Innospec, UK; Encapsulation: Perfumes and Beyond, a Moving Target to Aim At, *Antonio Quintieri*, Procter and Gamble, Belgium; Continuous Flow Technology as a Tool for Process Intensification of Formulation Processes, *Dirk Kirschneck*, Microinnova Engineering GmbH, Austria; Improving Efficiency and Quality in Development of Coatings Using High Throughput Technologies, *Thomas Brinz*, Robert Bosch GmbH, Germany; Functionalization of Polyurea Microcapsules to Enhance Binding to the Leaf Surface, *Lorenzo Aulisa*, Dow AgroSciences, France; Improved Skin Delivery of Actives with Silicone Technologies, *Marc Eeman*, Dow Corning Europe S.A., Belgium.
