

Carbon 2022

“Carbon for a Cleaner Future”

Short abstract submission Extended to 15th February 2022

**3rd-8th July 2022, Imperial College
London**

The British Carbon Group is pleased to invite you to the 21st edition of the World Conference on Carbon, at Imperial College in the heart of London. Since the first World Carbon Conference in 2000, scientists from around the globe have discussed and celebrated advancements in the field of Carbon science and technology together in-person. After a two-year absence, we are delighted to continue that tradition in 2022. We cannot wait to welcome you to London to discuss 'Carbon for a cleaner future'. Our plenary lecturers are Nobel Prize Winner Professor Sir Kostya Novoselov, FRS, Professor Teresa Bandosz, research director Conchi Ania and Professor Jason Jieshan Qiu. **Keynote lectures for selected sessions will be chosen from amongst the submitted abstracts.**

Environmental Carbon
Carbon in Energy
Carbon in Biology, Medicine & Health
Graphite
Diamond
Heterocarbons

Nanoscale Carbons
Amorphous Carbons
Carbon Fibres & Composites
Physiochemical Carbon Properties
Innovative Carbons for Sustainability
