

# **Nucleosides and Nucleotides:** synthetic and biological chemistry

**Friday, 17th April 2015**  
London, UK

## **Second Announcement**

Organised by RSC Biological and Medicinal Chemistry Sector and RSC Nucleic Acids Group

## Synopsis

Nucleosides and nucleotides remain one of the most fruitful drug classes, providing about 50% of antiviral drugs and 20% of cancer drugs used in the UK. Nucleoside and nucleotide chemistry constitute a vibrant field of research for both synthetic and biological chemists. This meeting will bring together scientists at the interface of synthetic chemistry and biology to tackle current challenges and celebrate recent achievements in the field.

## Call for posters

Abstracts are invited for poster presentation, and the submission deadline is 6th March.

## Speakers include:

**Chris Meier** (University of Hamburg) - **keynote speaker**

*New approaches towards nucleoside analogue di- and triphosphate-prodrugs for antiviral chemotherapy*

**Chris McGuigan** (University of Cardiff) - **keynote speaker**

*ProTides and phosphorodiamidates as nucleotide pro-drug forms: from the lab to clinical use*

**Gilles Gosselin** (Idenix SARL) - *Tyzeka<sup>®</sup>, Sebivo<sup>®</sup>, a nucleoside analogue (2'-deoxy-L-thymidine, telbivudine) specifically used for the treatment of chronic hepatitis B: from the bench to its marketing approvals*

**Barry Potter** (University of Oxford) - *Approaches to drugging nucleotide Ca<sup>2+</sup>-mobilizing second messengers*

**Vivek Sharma** (Universities of Delhi and Southampton) - *Chemo-enzymatic convergent route to locked- & C-4'-spiro-ribonucleosides*

**James Tucker** (University of Birmingham) - *Organometallic mimics of nucleic acids and nucleosides*

**Gerd Wagner** (Kings College London) - *Non-natural derivatives of the ubiquitous dinucleotide NAD as probes for chemical biology and medicinal chemistry*

**Sam Whitehouse** (QuantumDx) - *Breaking lab - alternative uses for nucleosides*

**Andrew Woodhead** (Astex Therapeutics) - *The development of SGI-110, a potent hypomethylating agent, as an epigenetic therapy in cancer*

## Registration and Students

Registration is open, and fees are:

To 29 January	From 30 Jan to 19 Mar
£125 RSC member early	£150 RSC member standard
£155 Non-member early	£185 Non-member standard
£62 RSC student* member early	£75 RSC student* member standard
£78 Student* non-member early	£86 Student* non-member standard

£40 Late fee will apply to payments received from 20th March

\* Student is undergraduate or post-graduate student, not post-doc  
Some student bursaries are also available.

## Exhibitors

There will be a relevant trade exhibition, and those companies wishing to have a trade stand should apply early to avoid disappointment.

## Venue and Travel

Royal Society of Chemistry at Burlington House, London. Situated in central London, this venue is easily accessible by public transport.

## Organising Committee

Mark Betson, Peakdale Molecular  
David Hodgson, RSC-NAG (Co-chairman)  
Jon Watts, RSC-BMCS (Co-chairman)  
Joe Sweeney, RSC-BMCS

## Contact Secretariat

Maggi Churchouse, 3 East Barn, Market Weston Road, Theltham, Diss IP22 1JJ, UK  
telephone and fax +44 (0)1359 221004, [maggi@maggichurchouseevents.co.uk](mailto:maggi@maggichurchouseevents.co.uk)
