

Inorganic Chemistry Symposium

Monday 24 October
Kyushu University

10:00	Opening remarks Hiromitsu Urakami, Royal Society of Chemistry
	Session Chair: Li-Zhu Wu
10:10	Where the rubber meets the road - polyMOFs Seth M.Cohen <i>University of California, San Diego, USA</i>
10:50	Graphene oxide and reduced graphene oxide hybrids Shinya Hayami <i>Kumamoto University, Japan</i>
11:30	Photon Upconversion based on Triplet Energy Migration Nobuhiro Yanai <i>Kyushu University, Japan</i>
11:50	Lunch
	Session Chair: Andrew Shore
13:00	Artificial photosynthetic systems for chemical transformation Li-Zhu Wu <i>Chinese Academy of Science, China</i>
13:40	Molecular catalysts and photocatalysts towards solar water splitting reactions Ken Sakai <i>Kyushu University, Japan</i>
14:20	Coffee break
	Session Chair: Seth M. Cohen
14:35	Architectural control of f-block organometallics for small molecule Polly Arnold <i>University of Edinburgh, UK</i>
15:15	Coordination chemistry of N-confused expanded porphyrinoids toward near-IR optical materials Masatoshi Ishida <i>Kyushu University, Japan</i>
15:35	Crystal engineering of multicomponent molecular puzzles for photofunction design Toshikazu Ono <i>Kyushu University, Japan</i>
15:55	Coffee Break
	Session Chair: Polly Arnold
16:10	Design of functional composites based on liposome and metal complex Tomomi Koshiyama <i>Kyushu University, Japan</i>
16:30	H₂ and O₂ activation Seiji Ogo <i>Kyushu University, Japan</i>
17:10	Publishing your research in high impact journals Andrew Shore <i>Royal Society of Chemistry, UK</i>
17:40	Closing Remarks Yoshio Hisaeda <i>Kyushu University</i>
