

# DISCOVER ENERGY EFFICIENCY...

**22 September 2011  
Huddersfield**

and how it will affect your business.

*Energy prices are forecast to more than double by 2020, increasing the pressure to produce high quality products at competitive prices. Efficient energy use in the industrial sector has never been more essential. Industry uses a large amount of energy to power a diverse range of manufacturing processes.*

## Why attend?

At this event you will learn about energy efficiency and creating an energy aware organisation. You will be able to justify return on investment and unlock sustainable saving potentials for you and your business. You will gain an invaluable insight in to the future of energy efficiency.

- Listen to case studies and presentations.
- Participate in workshops.
- Share your experiences of these ever present issues.
