

17th International Conference on Composite Materials ICCM-17

27-31 July 2009: Edinburgh, UK

This conference continues the unrivalled tradition of ICCM, the world's leading composite conference series. Internationally renowned composite scientists, engineers, and designers continue to attend the ICCM series in order to present their newest findings and keep up to date with the latest achievements in these very active, high-technology fields.

Support for the conference will provide your company with an ultimate opportunity to maintain a high profile and communicate your message to an international audience of industry leaders.

Conference sponsorship is an effective platform to build relationships and brand identity. Exhibition display space is available exclusively to organisations taking selected sponsorship packages, enabling the opportunity to present products, services, equipment and technology to a tightly defined and targeted audience. Extensive pre-conference publicity will promote your organisation to the widest possible audience.

600 delegates from academia, industry and associations are expected to attend the conference. These will include practitioners, researchers, educators and users across the complete spectrum of the Composites industry. The established delegate base offers access to a truly international audience.

The sponsorship packages are flexible and can be tailored to requirement.

To discuss the opportunities in more detail contact Paul Harris on +44 (0)20 7451 7302 (email: paul.harris@iom3.org).
