

Chemistry in the Oil Industry XVI New Chemistries for Old Problems

4th – 6th November 2019, Manchester, UK

CALL FOR PAPERS

We are accepting papers from all parts of the oil and gas industry (upstream, midstream and downstream) where chemistry is the central theme. With the industry adjusting to the “new normal”, the focus returns to innovative, value-adding chemistries. Improved understanding of chemistry can lead to field developments and extension that would otherwise be uneconomic. The industry’s responsibility to do this safely and with due concern for the environment is paramount. Paper submissions are invited in the following areas:

- Drilling / Hydraulic Fracturing
- Flow Assurance
- Decommissioning
- Geology and Geochemistry
- Enhanced Oil Recovery
- Shale operations
- New and Green Chemistry
- Corrosion Inhibition
- Regulation and Economics

(preference will be given to abstracts which clearly describe chemical functionality and structure)

A poster session and exhibition will run alongside the conference

Papers not selected for oral presentation may be selected for the poster session and published in the proceedings

Bursaries may be available

DIARY OF EVENTS

1 February 2019	Submission deadline for abstracts of offered papers and posters. Abstracts up to 450 words in .doc(x) or .pdf format should be sent to tricia.francis@rscspecialitychemicals.org.uk
End March 2019	Programme will be finalised and speakers notified
2 August 2019	Authors are required to submit full text versions of their papers for committee review
30 September 2019	Authors are required to submit final paper text and draft presentations slides for review

SYMPOSIUM ORGANISING COMMITTEE

Richard Bligh-Smith	The Dow Chemical Company
Henry Craddock	HC Oilfield & Chemical Consulting
Jack Dunlop	JD Vistas Ltd
Harry Frampton	BP Upstream Technology
Kevan Hatchman	Star Brands Ltd
Steve Jackson	Baker Hughes, a GE Company
Myles Jordan	Nalco Champion, an Ecolab Company
Nik Robinson	EOSCA & NIKAM Consulting
Andrew Shepherd	Shell Australia Pty Ltd
Clare Temple-Heald	Innospec Inc

This International Symposium is organised by the Royal Society of Chemistry Speciality Chemicals Sector and the European Oilfield Speciality Chemicals Association. Sponsorship opportunities are available.

For more details please contact the CITOI Conference Secretariat
