

Earlscliffe

OPEN LAB AT EARLSCLIFFE

Royal Society of Chemistry, Kent Local Section

Saturday, 25 November 2023

10:00-16:00

26 Grimston Gardens, Folkestone, CT20 2PX

Earlscliffe College's A-Level Chemistry students would like to invite members of the local community to join in a celebration of chemistry through this special, hands-on activity day.

The activity lasts for about an hour and all safety equipment will be provided.

This is the third time we organise this event for almost all ages (10-100) and no science knowledge is required. The theme this year is colour and through colourful chemistry making the invisible visible. No explosions, I am afraid, but amazing colours will emerge in front of our very eyes with activities led by our young expert scientists, along with FUJIFILM's chemistry expert Craig Milsted.

To book your session contact Robert Goldmann (Chemistry teacher)
robertgoldmann@earlscliffe.co.uk

Sessions start on the hour between 10:00 and 16:00.
