

Programme

Time	Event	Session Chair
09:00	Introduction and welcome	
09:20	Drug Design Based on Ligand-Target Binding Kinetics Hualiang Jiang, <i>Shanghai Institute of Materia Medica, CAS</i>	
10:10	Coffee break	
10:30	GLP-1R: form a small-molecule agonist to the determination of crystal structures Ming-Wei Wang, <i>School of Pharmacy, Fudan University</i>	
11:20	Single-molecule analysis in an electrochemical confined space Yi-Tao Long, <i>School of Chemistry and Molecular Engineering, East China University of Science and Technology</i>	
12:10	Group photo & Lunch	
13:30	Royal Society of Chemistry - supporting the chemical science community in tackling health global challenges Richard Kelly, <i>Royal Society of Chemistry</i>	
13:45	Estrogen Related Receptor (ERR) Modulators as Novel Potential Agents for Metabolic Disorders Ke Ding, <i>School of Pharmacy, Jinan University, Guangzhou</i>	
14:35	Coffee break	
15:00	Convergent Total Synthesis of Bioactive Molecules Dawei Ma, <i>Shanghai Institute of Organic Chemistry, CAS</i>	
15:50	Structure-based Drug Design (SBDD) in Medicinal Chemistry-Enabled Drug Discovery Hong Shen, <i>Roche Innovation Center Shanghai</i>	
16:40	Panel discussion	
17:10	Close
