synopsis

The aim of this Symposium is to showcase chemistry being undertaken in an industrial setting by graduate chemists.

What the meeting will cover

This annual one-day meeting, now in its 18th year, represents a unique opportunity for younger chemists to showcase their research to an external audience. The programme includes a wide range of topics including process, flow and medicinal chemistry presentations. It also incorporates a competitive element with prizes awarded for the best talk (and two runners-up), as judged by the Organising Committee. This year the prizes and wine mixer are generously sponsored by Domainex Ltd, MRC Technology and Novartis.

information on SCI

SCI is an international, independent charity whose remit is to promote the application of science for the benefit of society.

Established since 1881, SCI works hard to advance and promote scientific knowledge and innovation while acting as a bridge between science and business. It does this by bringing together people from a wide variety of backgrounds including scientists, business people, industrialists, researchers and students from all over the world.

SCI is the publisher of many well respected journals and industry leader Chemistry & Industry magazine (C&I). SCI can offer a network of contacts spanning education, science and business, an in-depth knowledge of chemical related industries together with a rolling programme of conferences, awards and scholarships to help further knowledge and support those involved in the sector no matter what stage of their careers.
