Synthesis of α -Enamino Esters via Cu(II)-promoted Dehydrogenation of α -Amino Acid Esters: Application to Synthesis of Polysubstituted Pyrroles

Nini **Zhou**, Zhongle **Li**, Zhixiang **Xie***

State Key Laboratory of Applied Organic Chemistry, College of Chemistry and
Chemical Engineering, Lanzhou University, Lanzhou, 730000, P. R. China

Table of Contents

1	^1H NMR and ^{13}C NMR Spectra for α -enamino esters 2a-2q	S2-S18
2	^1H NMR and ^{13}C NMR Spectra for pyrroles 3a-3n	S19-S32
3	^1H NMR and ^{13}C NMR Spectra 4a	S33
4	^1H NMR and ^{13}C NMR Spectra 4b	S34
