- (24) J. S. Chickos and W. E. Acree, Jr., "Total phase change entropies and enthalpies. An update on their estimation and applications to the estimations of amphiphilic fluorocarbon-hydrocarbon molecules", *Thermochim. Acta*, 2003, **395**, 59-113.

## Thermodynamic Databases

There exist a large number of databases listing thermodynamic parameter values, densities, and crystal structures. These should provide the first resource in considering thermodynamic prediction, but VBT, TDR and SSA provide their backup, as both predictive procedures and checks of the listed values.
