

Targeted Theranostic liposomes: Rifampicin and Ofloxacin loaded pegylated liposomes for theranostic application in mycobacterial infections

Ankur Kaul^a, Shubhra Chaturvedi, Asha Attri^b, Mohini Kalra^b, AK Mishra^{a*}.

SUPPLEMENTARY INFORMATION

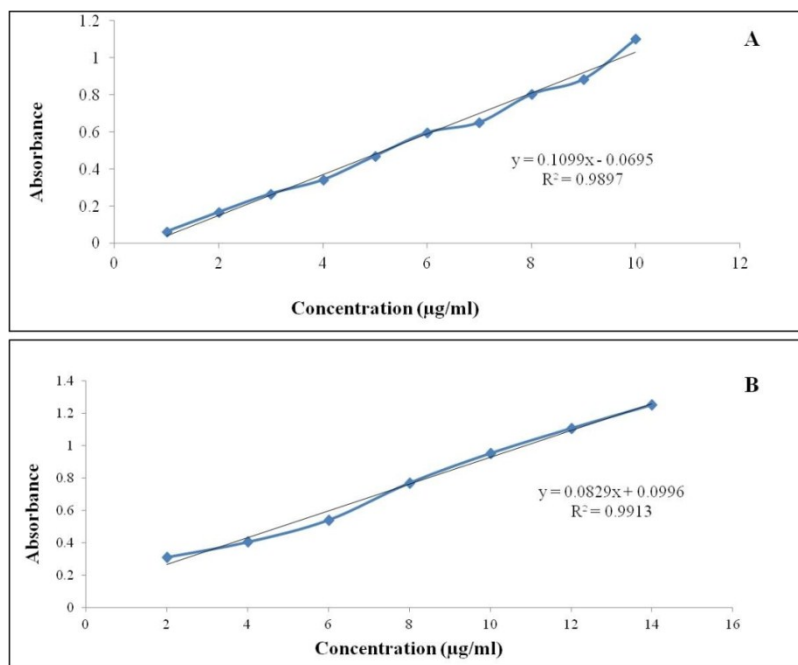

Fig S1 Standard calibration curves for (A) Rifampicin and (B) Ofloxacin respectively determined using UV/Vis spectrophotometer.

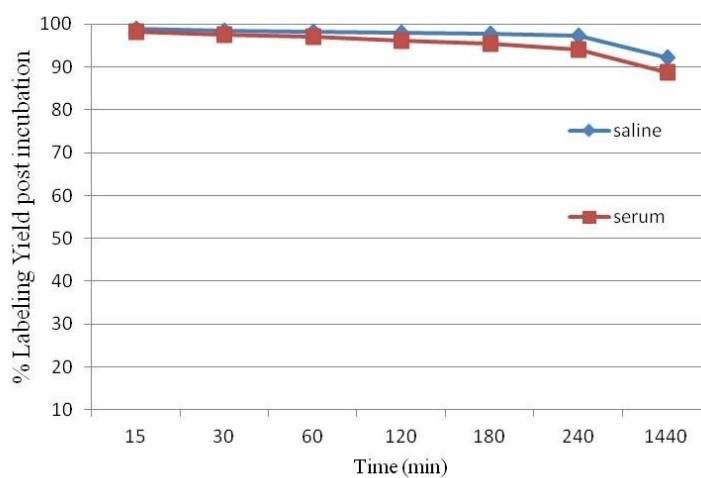

Fig S2 In-vitro serum stability studied upto 24 h post-labeling with ^{99m}Tc.
