

## **Supporting information**

### **Chromogenic and fluorogenic multianalyte detection with a tuned receptor: Refining selectivity for toxic anions and nerve agents**

Vinod Kumar\*, Hemlata Rana, G. Raviraju, Praphat Garg, Anuradha Baghel and A. K. Gupta

*Defence Research and Development Establishment, Jhansi Road, Gwalior 474002, MP, India. E-mail: vkpali77@yahoo.co.in. Tel.: +91-751-2390203; fax: +91-751-2341148.*

<b>Contents</b>	<b>Page</b>
1. $^1\text{H}$ NMR spectra and $^{13}\text{C}$ NMR spectra of receptor <b>2</b> .....	S2
2. HRMS of receptor <b>2</b> (ESI positive mode).....	S3
3. $^1\text{H}$ NMR spectra and $^{13}\text{C}$ NMR spectra of receptor <b>3</b> .....	S4
4. HRMS of receptor <b>3</b> (ESI positive mode).....	S5
5. Gas Generation Chamber .....	S6

<sup>1</sup>H NMR spectrum of 2 (DMSO-*d*6)

<sup>13</sup>C NMR spectrum of 2 (DMSO-*d*6)

### HRMS of receptor 2 (ESI Positive mode)

<sup>1</sup>H NMR spectrum of 3 (DMSO-*d*6)

<sup>13</sup>C NMR spectrum of 3 (DMSO-*d*6)

**HRMS of receptor**

**Gas generation chamber**
