Supplemental Material (1 page)

Determination of Δ_0 of H_1 for Complexation between **1b** and **2** in Acetone- d_6

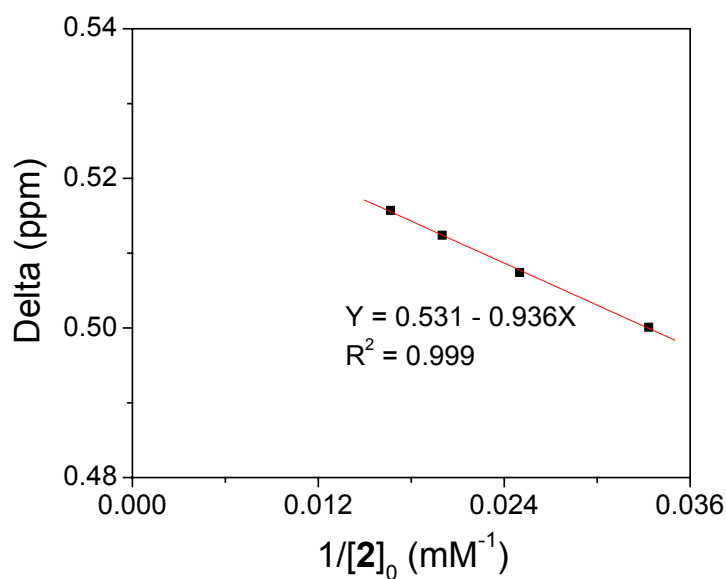

Figure S1. Relationship between Δ and $1/[2]_0$ for the complexation between **1b** and **2** in acetone- d_6 at 22°C. $[1b]_0$ and $[2]_0$ are initial concentrations of **1b** and **2**. $[1b]_0$ is constant at 0.500 mM.
