

## **Electronic Supplementary Information (ESI)**

**Table S1** Torsion angles ( $^{\circ}$ ) of the alkanoyl chains

**Table S2** Distances and angles of hydrogen bond type contacts.

**Fig. S1** Packing arrangement of the calixarene molecules in the complex of **1**·with (-)-menthone (**1a**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The two crystallographically independent calixarene molecules are indicated by different colours.

**Fig. S2** Packing arrangement of the calixarene molecules in the complex of **1**·with (-)-menthol (**1b**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The two crystallographically independent calixarene molecules are indicated by different colours.

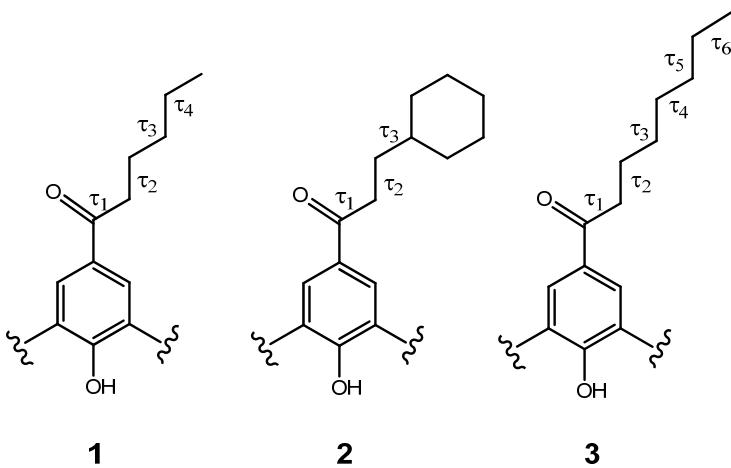

**Fig. S3** Packing arrangement of the calixarene molecules in the complex of **2**·with (-)-menthone (**2a**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The two crystallographically independent calixarene molecules are indicated by different colours.

**Fig. S4** Packing arrangement of the calixarene molecules in the complex of **2**·with (+)-carvone (**2b**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The two crystallographically independent calixarene molecules are indicated by different colours.

**Fig. S5** Packing arrangement of the calixarene molecules in the complex of **3**·with (+)-carvone (**3a**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The two crystallographically independent calixarene molecules are indicated by different colours.

**Fig. S6** Packing arrangement of the calixarene molecules in the complex of **3**·with *n*-butanol (**3b**) viewed from the crystallographic *a*, *b* and *c* axes, respectively. The space group is the centrosymmetric *P*2<sub>1</sub>/*n* and there is one complex molecule in the asymmetric unit only.
