Table S2. Antibody information

Primary antibodies

Target	Reactivity	Manufacturer	Cat. No.	Dilution
Sarcomere alpha actinin (SAA)	human/rat	Sigma	A7811	1:500
Cardiac troponin T (cTnT)	human/rat	abcam	ab8295	1:200
Cardiac troponin T (cTnT)	human	abcam	ab64623	1:200
CD31	rat	Novus	AF3628	1:200
CD31	human	abcam	Ab32457	1:200

Secondary antibodies

Name	Manufacturer	Cat. No.	Dilution
FITC-conjugated donkey anti-goat antibody	Invitrogen	A11055	1:500
TRITC -conjugated goat anti-mouse antibody	Invitrogen	A11005	1:500
TRITC -conjugated donkey anti-goat antibody	Invitrogen	A32758	1:500
TRITC -conjugated goat anti-rabbit antibody	Invitrogen	A11012	1:500

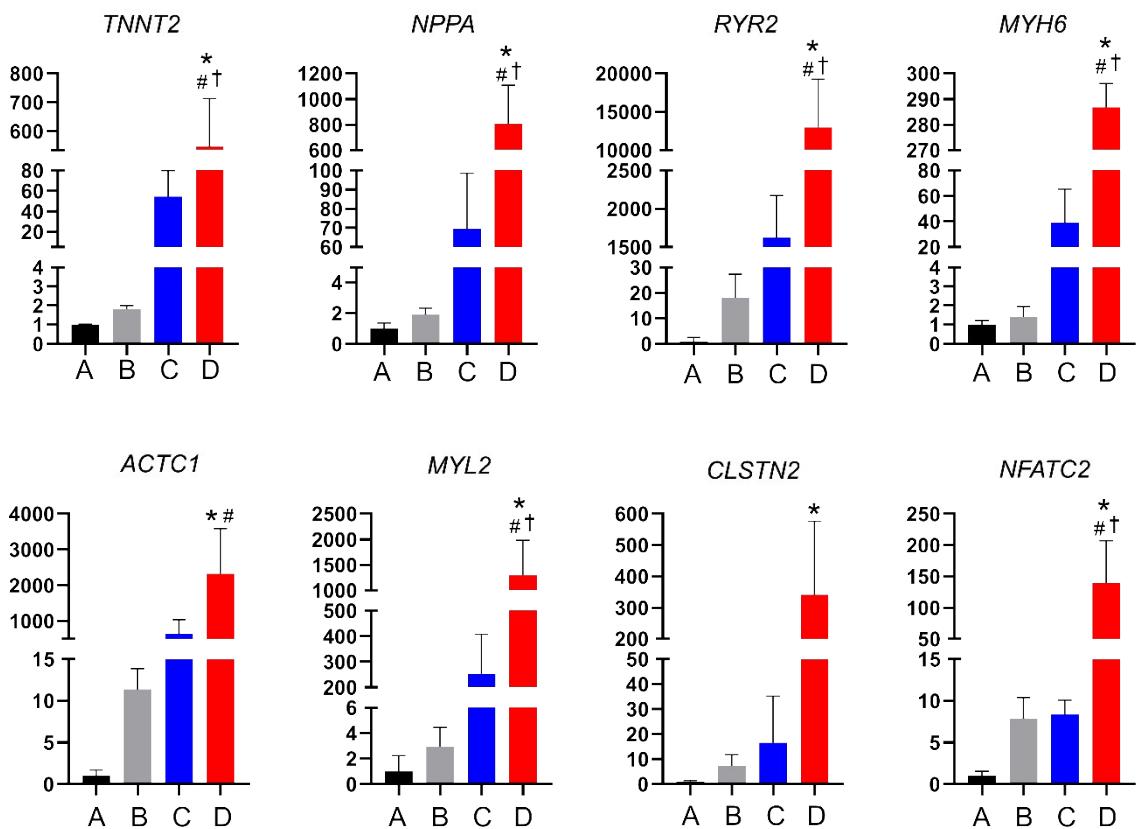

Figure S1. mRNA levels of cardiac markers and statistical analysis.

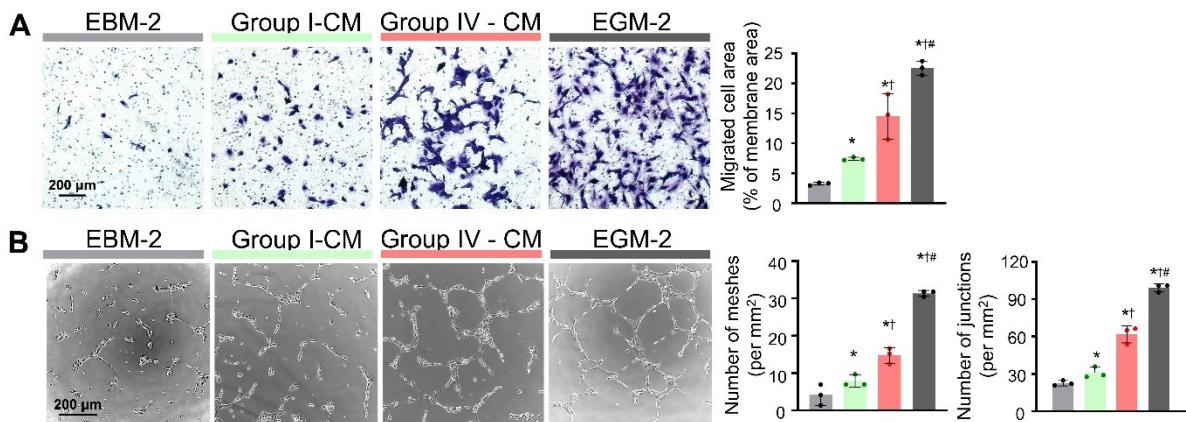

Figure S2. Pro-angiogenic paracrine effect of reprogrammed cell sheets. (A) HUVEC migration assay using Transwell (B) HUVEC tube formation assay. * $p < 0.05$ versus EBM-2 group, † $p < 0.05$ versus Group I-CM group, # $p < 0.05$ versus Group IV-CM group. n = 3 per group.

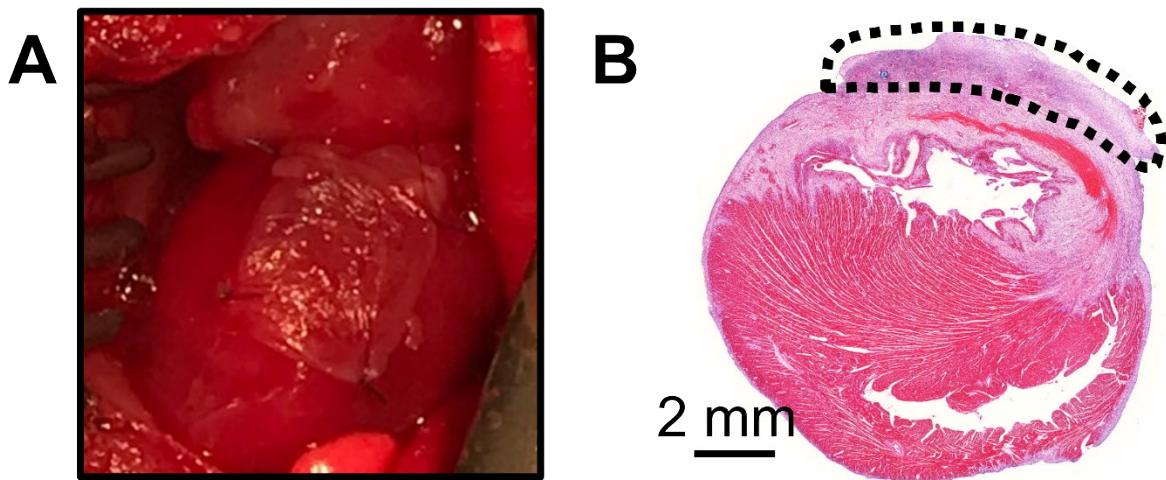

Figure S3. The epicardial implant of PMCS on the rat heart (A) and H&E stained section image for confirmation of stable mobilization of PMCS.

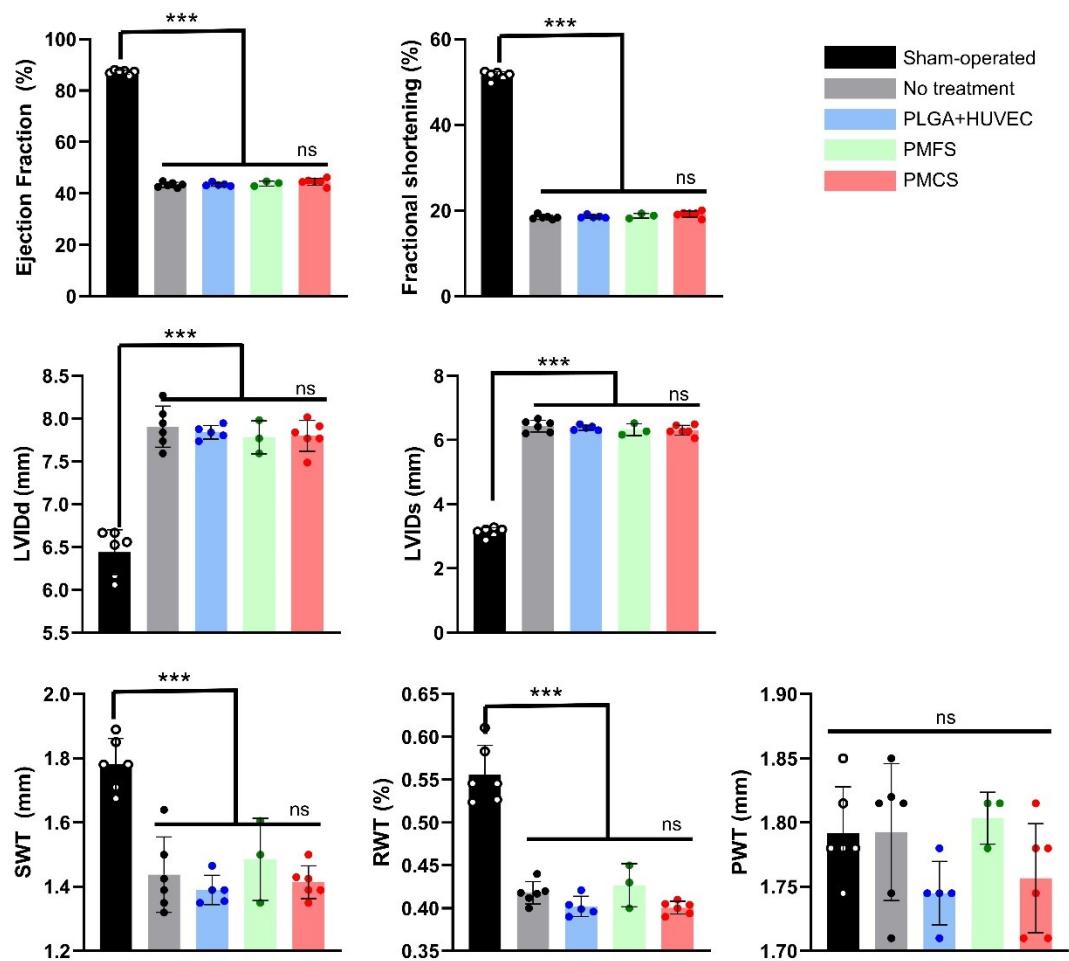

Figure S4. MI modeling before treatment compared to the sham-operated group.

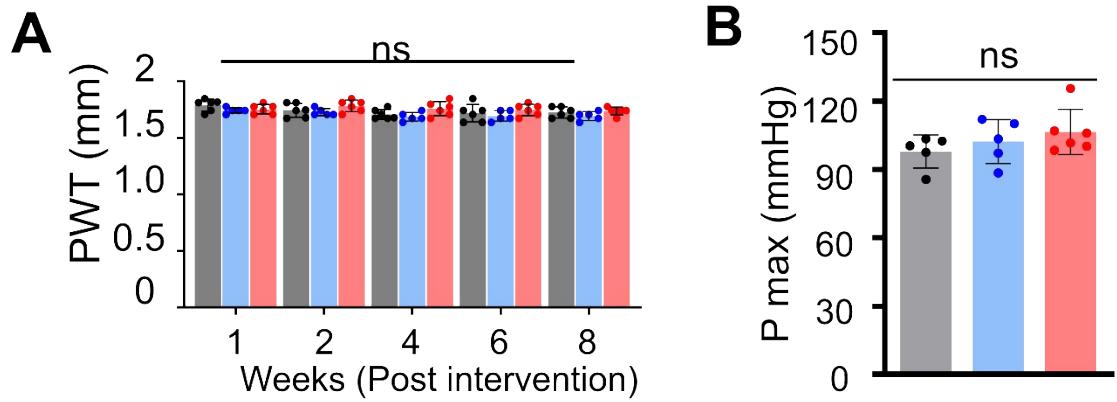

Figure S5. (A) Posterior wall thickness in echocardiography and (B) maximum pressure in P-V study

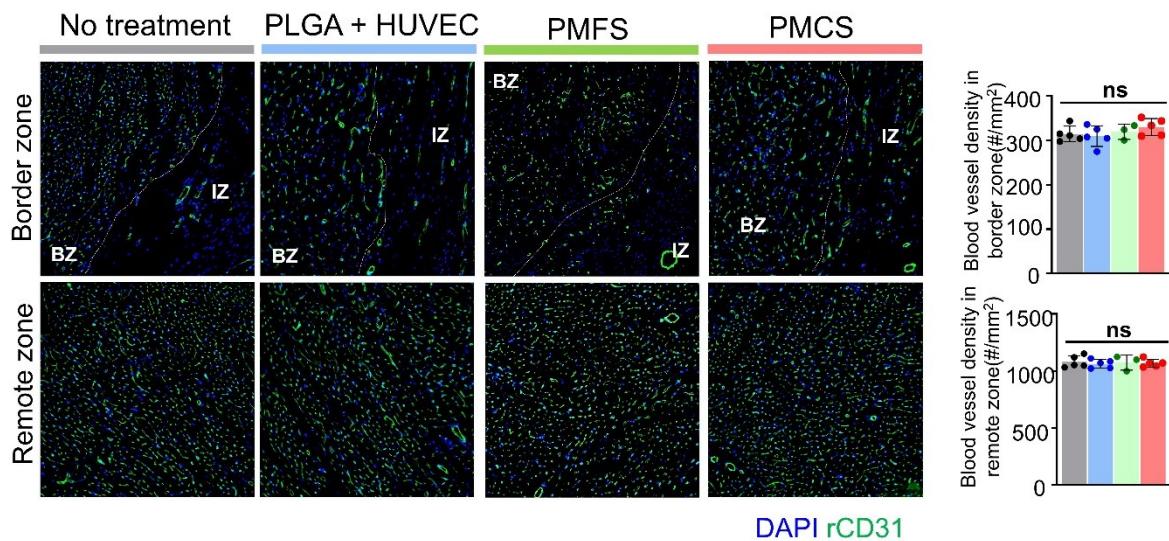

Figure S6. Representative images of blood vessels in the border zone and remote zone visualized by immunostaining of CD31 and the quantitative analysis 8 weeks after implant
