1. General

All commercial reagents were used directly without further purification, unless otherwise stated. Dimethyl sulfoxide (DMSO) was purchased from J & K chemical, stored over 4 Å molecular sieves and handled under N₂. DMSO-*d*₆ and CDCl₃ were purchased from Shanghai aladdin Biochemical Technology Co., Ltd. All Schlenk tubes and sealed vessels (50 mL) were purchased from Beijing Synthware Glass. The following abbreviations were used to describe NMR signals: s = singlet, d = doublet, t = triplet, m = multiplet, dd = doublet of doublets, q = quartet.
