

Supplementary Fig. 1 Immunohistochemical staining for mesenchymal stem cell markers in hypoperfusion-induced abdominal aortic aneurysm wall. Representative images of immunostaining for CD44 in the control (A) and fish oil (B) groups. (C) Quantification of CD44 positive area. Representative images of immunostaining for CD90 in the control (D) and fish oil (E) groups. (F) Quantification of CD90 positive area. Scale bars = 100 μ m. Data are expressed as the mean \pm SD (n = 7). * Represents a significant difference ($p < 0.05$).
