

supplementary information

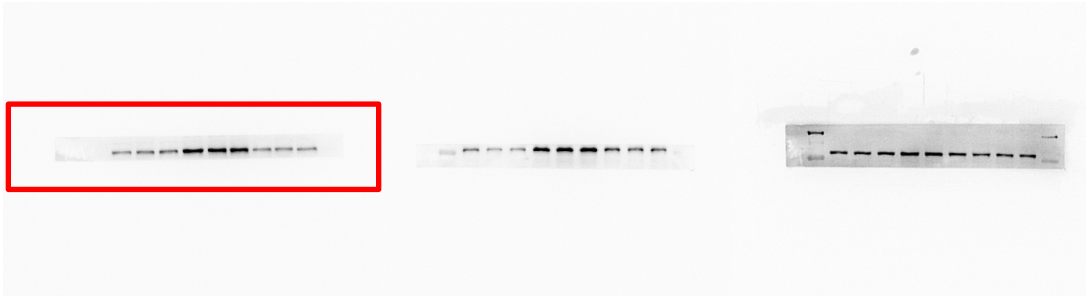

1. Electrophoretic gels and blots

For your convenience, we have prepared the PDF of the information. Each experiment was repeated three times and named after the protein and number of times. The bands used for drawing are marked by red boxes.

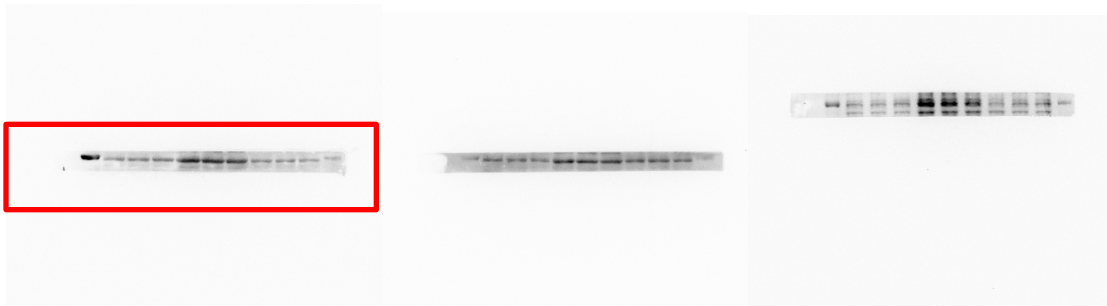

The same information is also included in the zip file.

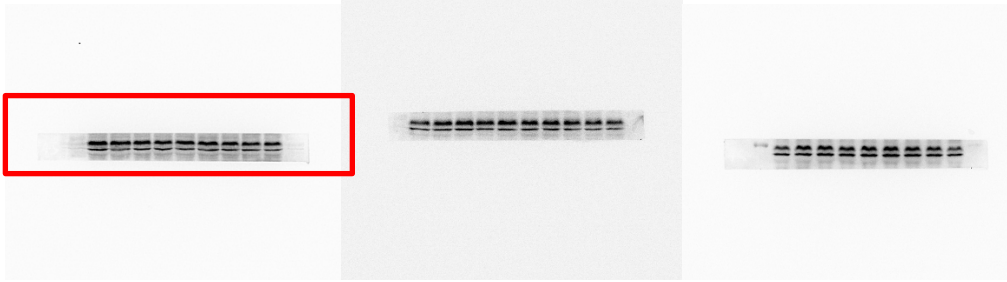

S1 Col-I ---3 days

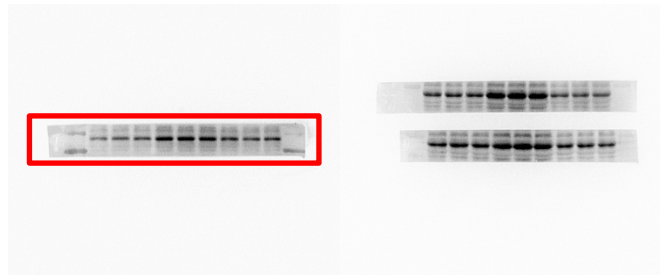

S2 MMP-9 ---3 days

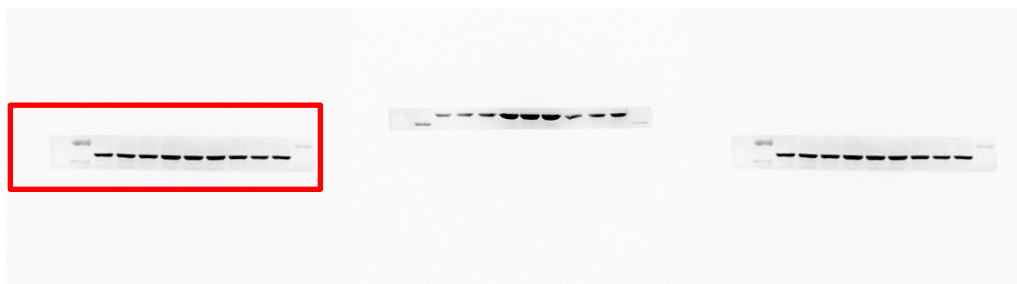

S3 P-Smad3---3 days

S4 Smad3---3 days

S5 TGF-β1---3 days

S6 α-SMA---3 days

S7 CTGF---3 days

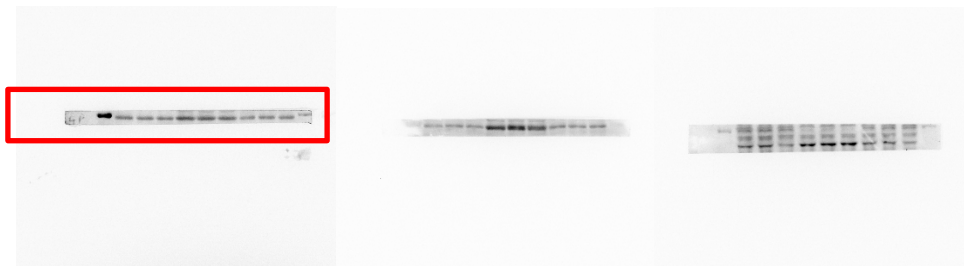

S8 GAPDH---3 days

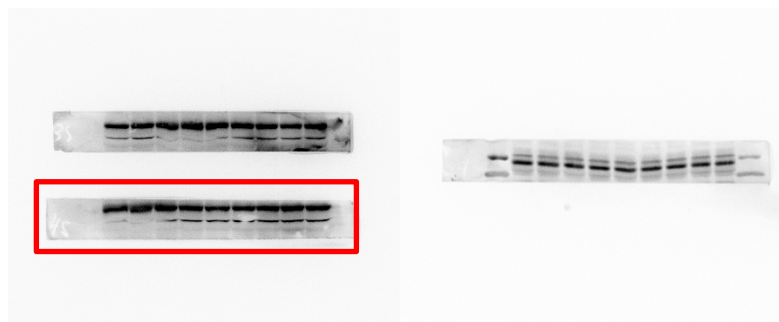

S9 Col-I ---3 weeks

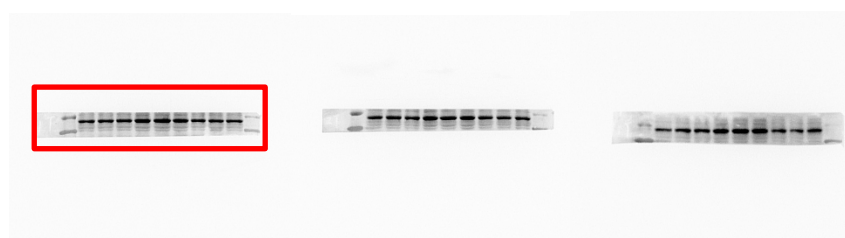

S10 MMP-9 ---3 weeks

S11 P-Smad3 ---3 weeks

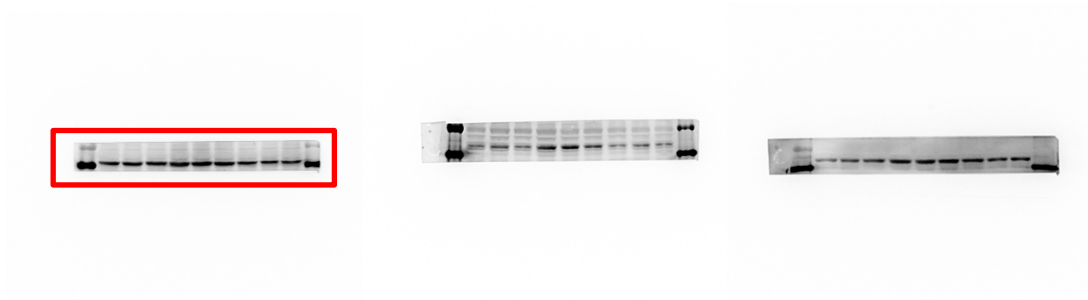

S12 Smad3 ---3 weeks

S13 TGF-β1 ---3 weeks

S14 α -SMA ---3 weeks

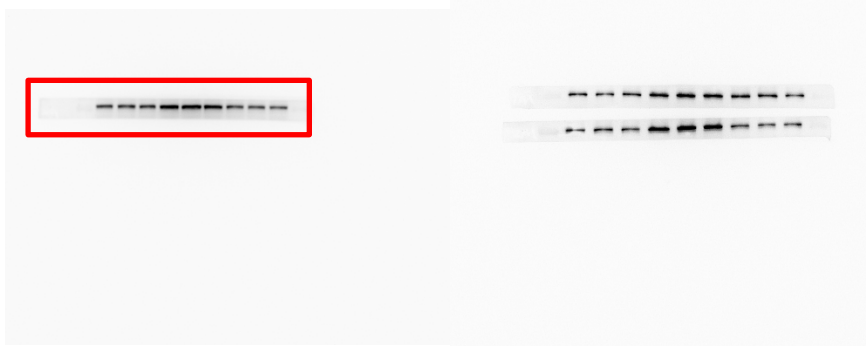

S15 CTGF ---3 weeks

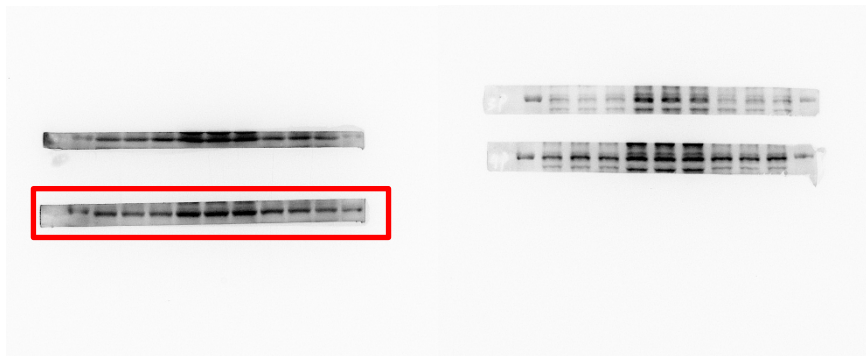

S16 GAPDH ---3 weeks

S17 Col-I---adulthood

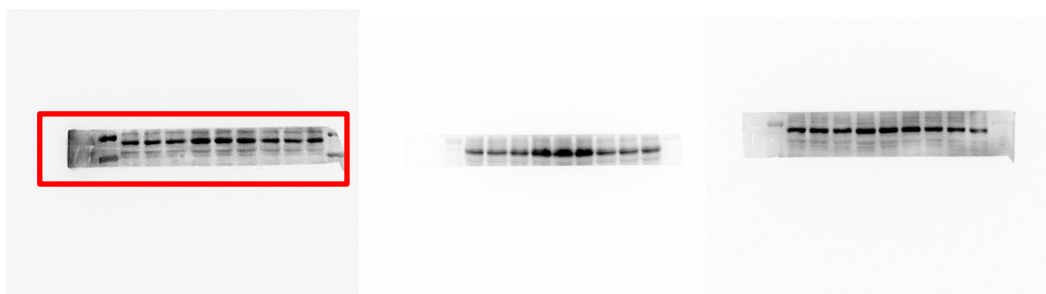

S18 MMP-9---adulthood

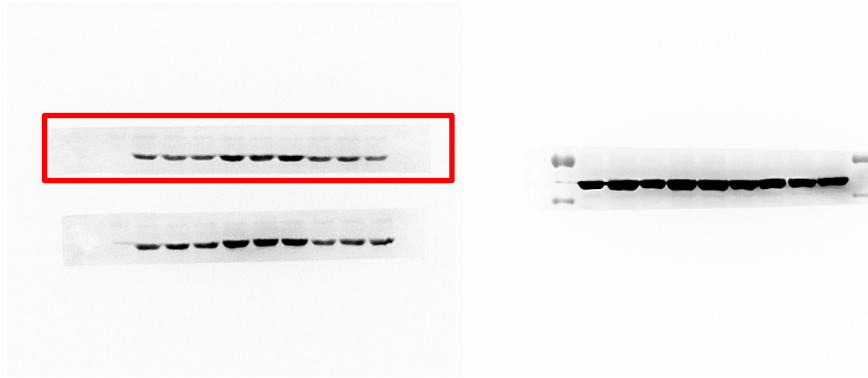

S19 P-Smad3---adulthood

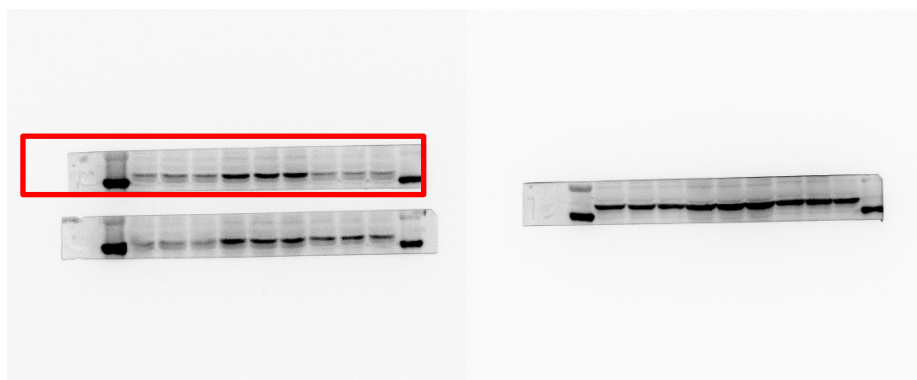

S20 Smad3---adulthood

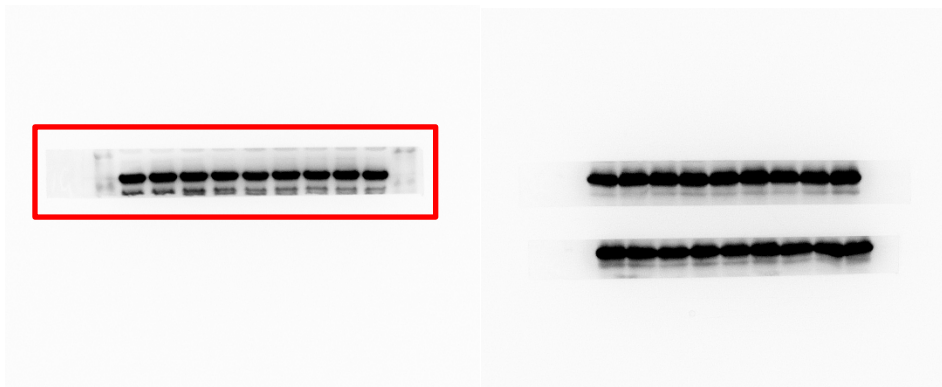

S21 TGF-β---adulthood

S22 α -SMA---adulthood

S23 CTGF---adulthood

S24 GAPDH---adulthood

2. Other data: presented in excel.
