

Figure S1. Lnc-TMEM132D-AS1 overexpression decreases osimertinib sensitivity in osimertinib-sensitive NSCLC cells. (A, B) Lnc-TMEM132D-AS1 overexpression increased the cell viability and colony formation of osimertinib-sensitive cells after osimertinib treatment. (C, D) Lnc-TMEM132D-AS1 overexpression inhibited the cell apoptosis and G2/M-phase cell cycle arrest in osimertinib-sensitive cells after osimertinib treatment. ** $P < 0.01$, *** $P < 0.001$.
