The first data comes from a previous article on the study of goat milk fat. We tested the workflow system with raw mass spectrometry data of goat milk fat from a previous study. (<https://dx.doi.org/10.1021/acs.jafc.0c02234>). The second data (mzML) were downloaded from the MetaboLights (MTBLS549). For a number of reasons, we chose a total of 23 data in positive and negative ion mode to test the metabolomic workflows system. Additional details can be found at (<http://www.ebi.ac.uk/metabolights>).

Table S1. Triacylglycerols compound identified from workflow A and workflow C.**Workflow A**

Identifier	Formula	Description	m/z	rt (min)	Adduction
