

SUPPLEMENTARY INFORMATION

Facile fabrication of phosphonium-based ionic liquid impregnated chitosan adsorbent for the recovery of hexavalent chromium

Mochamad Lutfi Firmansyah*, Thalabul Ilmi, Rino Rakhmata Mukti, Patmawati, and Masahiro Goto

Table S1. Breakthrough curve models parameter of Pd(II) adsorption

| C_i [mg L ⁻¹] | Q [mL min ⁻¹] | Z cm | Chitosan | | | | Chi_IL | | | |
|--------------------------------|------------------------------|------------------|----------|--------------------|--------------------|------------------|--------|-----|-------------|------|
| | | | Thomas | | Yoon-Nelson | | Thomas | | Yoon-Nelson | |
| q _{e,exp} | q _{e,cal} | t _{0.5} | τ | q _{e,exp} | q _{e,cal} | t _{0.5} | τ | | | |
| 50 | 5 | 4 | 114 | 115 | 900 | 890 | 206 | 201 | 1060 | 1080 |
| 50 | 5 | 5 | 67 | 64 | 800 | 810 | 114 | 118 | 1180 | 1160 |
| 50 | 5 | 6 | 45 | 44 | 710 | 720 | 74 | 71 | 1240 | 1250 |
| 50 | 5 | 6 | 45 | 44 | 710 | 720 | 74 | 71 | 1240 | 1250 |
| 50 | 10 | 6 | 51 | 54 | 660 | 670 | 104 | 105 | 1010 | 1000 |
| 50 | 15 | 6 | 54 | 58 | 450 | 460 | 109 | 106 | 660 | 670 |
| 50 | 5 | 6 | 45 | 44 | 710 | 720 | 74 | 71 | 1240 | 1250 |
| 100 | 5 | 6 | 46 | 47 | 620 | 600 | 75 | 75 | 800 | 800 |
| 200 | 5 | 6 | 47 | 56 | 420 | 400 | 86 | 87 | 490 | 500 |

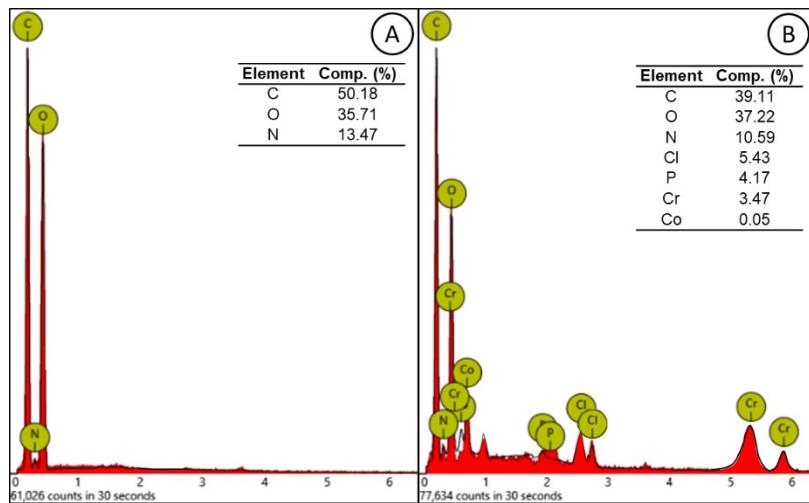

Figure S1. EDX spectra of (A) Unmodified chitosan and (B) post-adsorption Chi_IL

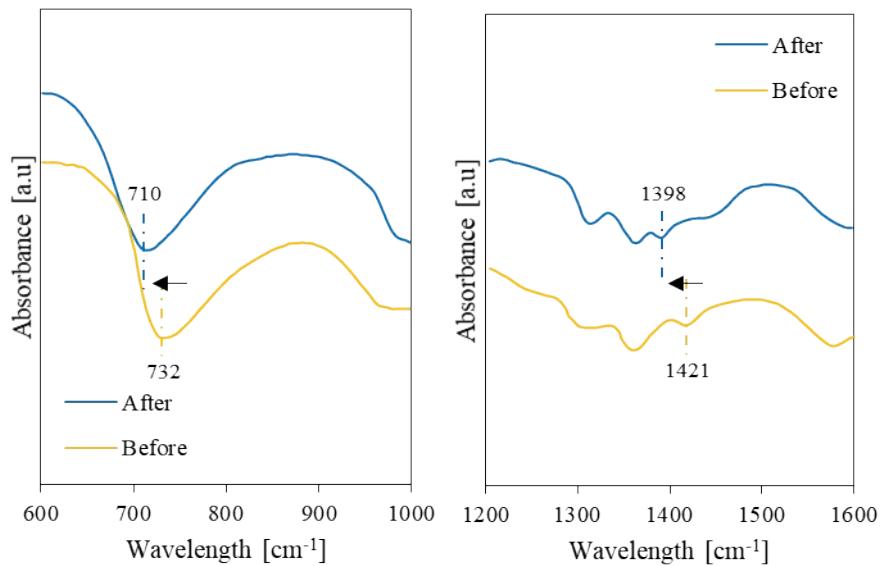

Figure S2. FTIR spectrum of Chi_IL pre and post adsorption of Cr(VI)

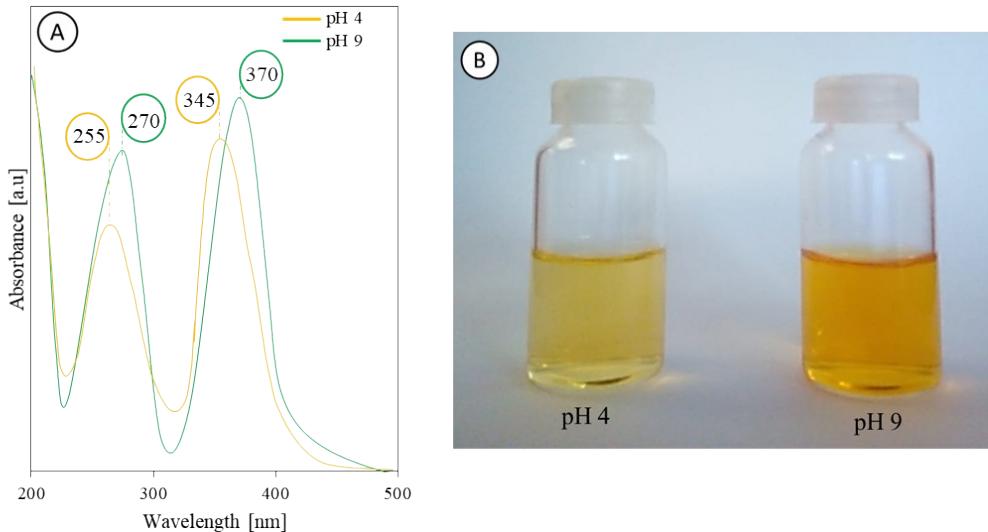

Figure S3. (A) UV-vis spectra and (B) visual observation of Cr(VI)-containing solution in different pH

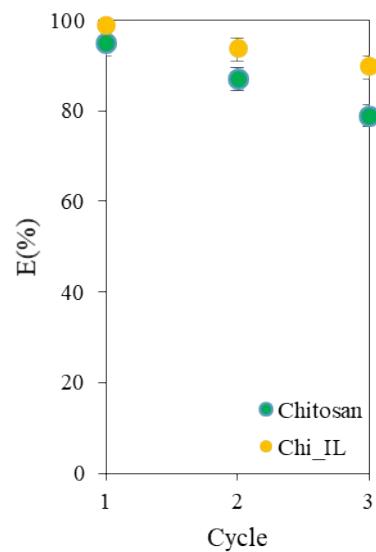

Figure S4. Regeneration performance of Chitosan and Chi-IL over Cr(VI) adsorption

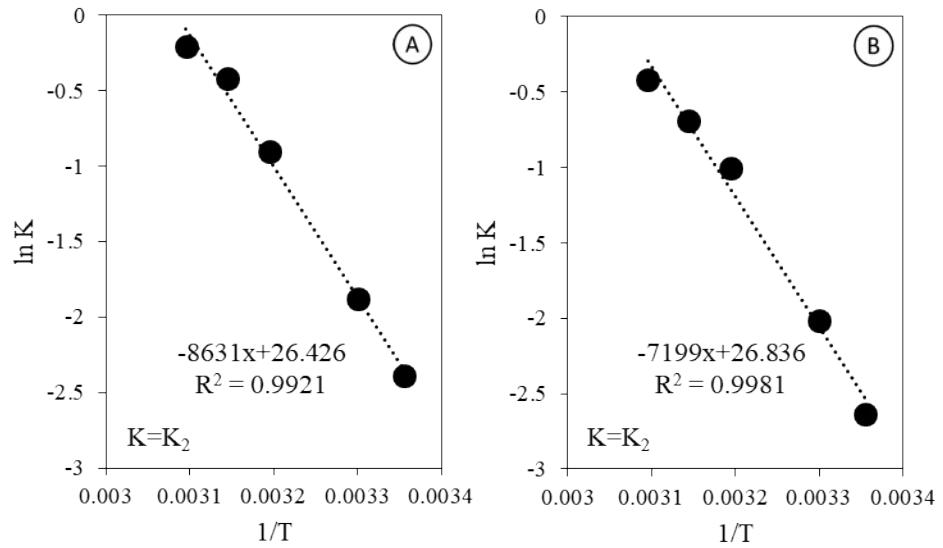

Figure S5. Arrhenius plot between $\ln K$ (K_2) vs $1/T$ for (A) Chi_IL and (B) Chitosan.

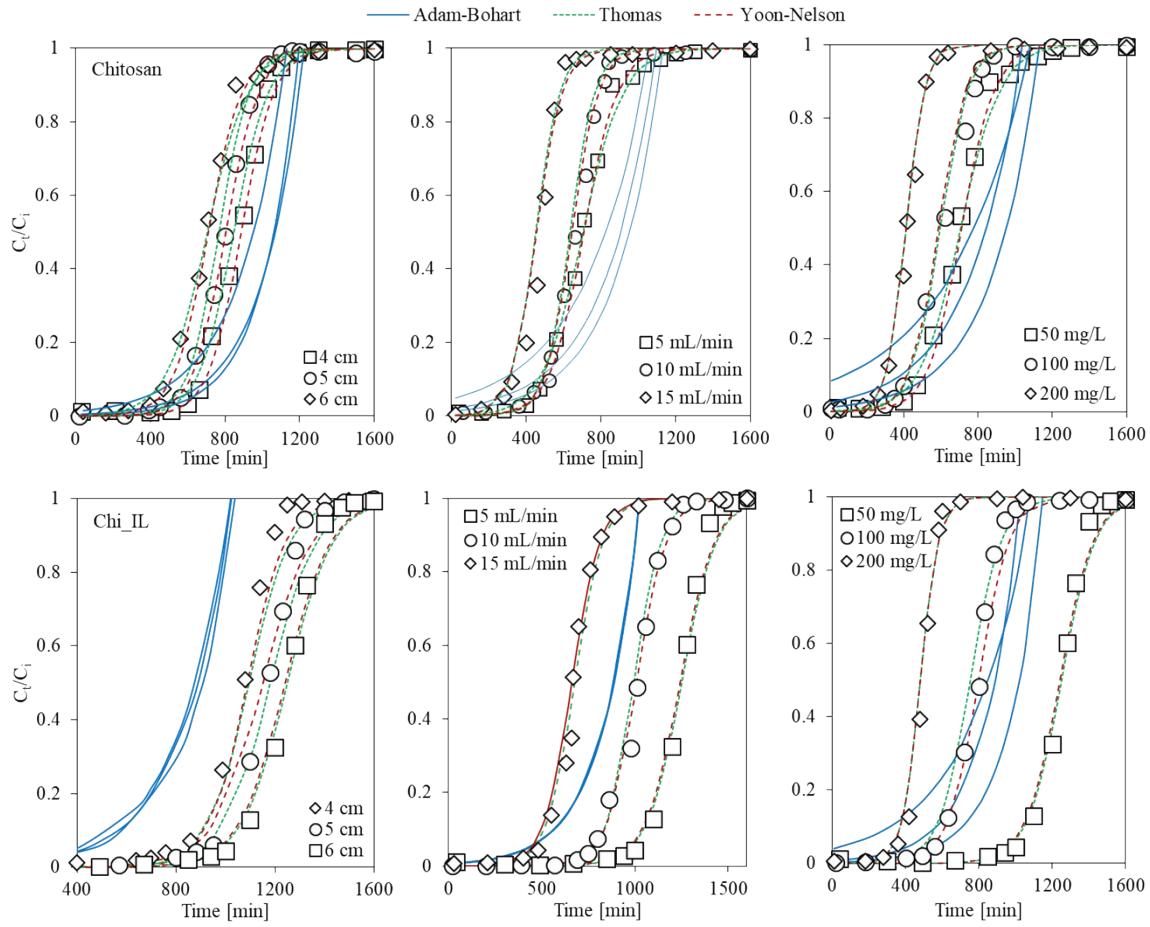

Figure S6. Column adsorption fitting between model and experimental for Chitosan and Chi_IL.
