## Supplementary Figures

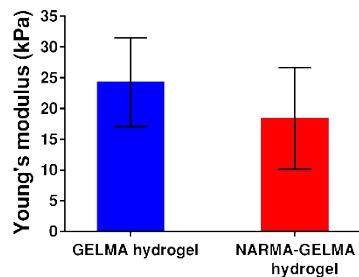

Figure S1. Young's modulus of NARMA-GELMA hydrogel and GELMA hydrogel.

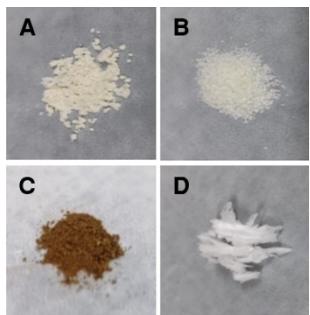

Figure S2. Observation of raw materials and modified products. (A) NAR, (B) GEL, (C) NARMA, (D) GELMA.

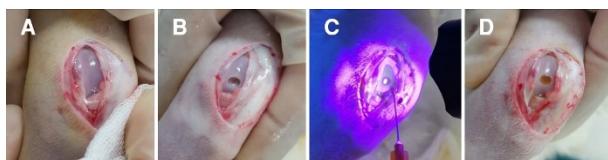

Figure S3. The injection and photocuring process of NAR derived medical bioink for cartilage repair in the rabbit articular cartilage defect model. (A) Joint exposure. (B) Cartilage defect creating. (C) Bioink implantation. (D) Observation of the fixed sample.

## Supplementary Tables

Table S1. 3D printing parameters of NAR derived bioink and GELMA bioink.

	NAR derived bioink		GELMA bioink	
Model (100 $\mu\text{m}/\text{layer}$ )	One sixth of a sphere	Cylindrical channel structure	One sixth of a sphere	Cylindrical channel structure
Size (mm)	6 (Diameter)	0.5 (Hole diameter)	6 (Diameter)	0.5 (Hole diameter)
Section numbers	15	15	15	15
Exposure intensity ( $\text{mW}/\text{cm}^2$ )	20	20	6	6
Exposure time (s)	8	8	8	8

Table S2. The sequence of primers used for RT-qPCR.
