### Correlation of laboratory data and predicted values of DMMP adsorption by experimental design

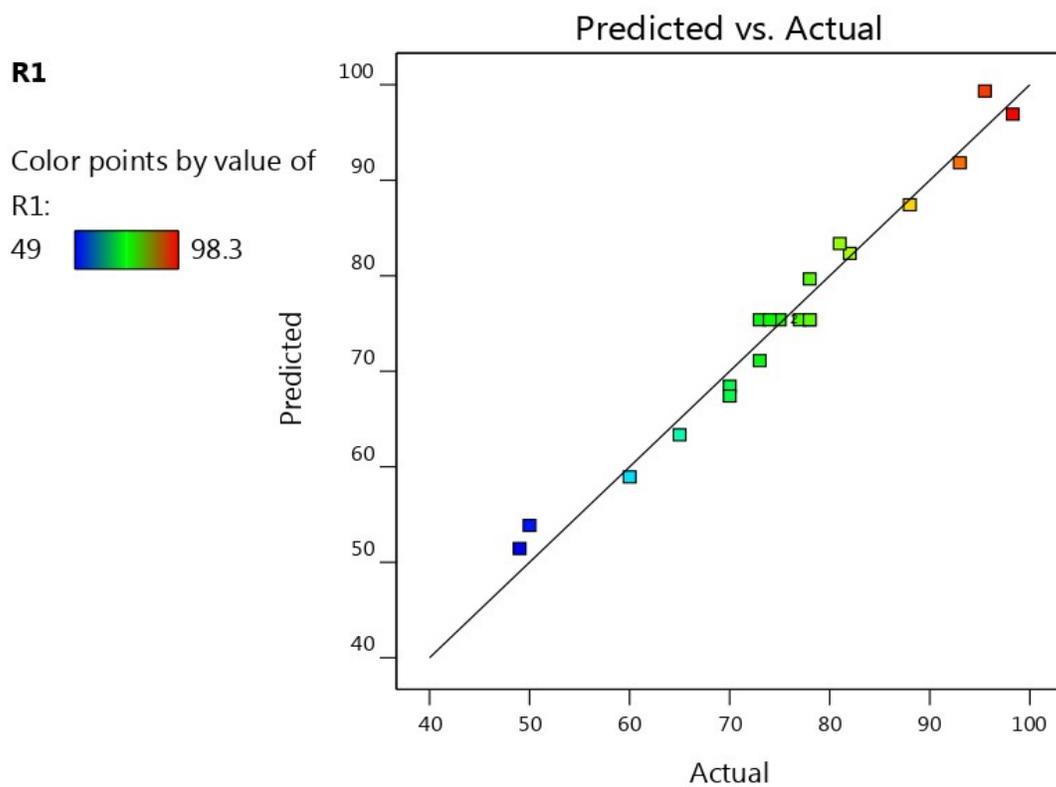

**Fig S1** Comparison of predicted response values in the model with laboratory values

**Fig. S2** The difference between the values obtained from the experiments and the model according to the predicted values

**Fig. S3** The difference between the values obtained from the tests and the model according to the number of tests

**Fig. S4** Status of values obtained from experiments and predicted values

**Table S1** Full report of calculation results related to each of the parameters in the order of number of experiments

Run Order	Actual Value	Predicted Value	Residual	Leverage	Internally Studentized Residuals	Externally Studentized Residuals	Cook's Distance	Influence on Fitted Value DFFITS	Standard Order
