Supplementary Fig. 1. Growth of *Vibrio alginolyticus*, *Vibrio harveyi* and *Vibrio parahaemolyticus* on LB+ colloidal chitin agar plates and the size of hydrolytic circles produced (5 days).

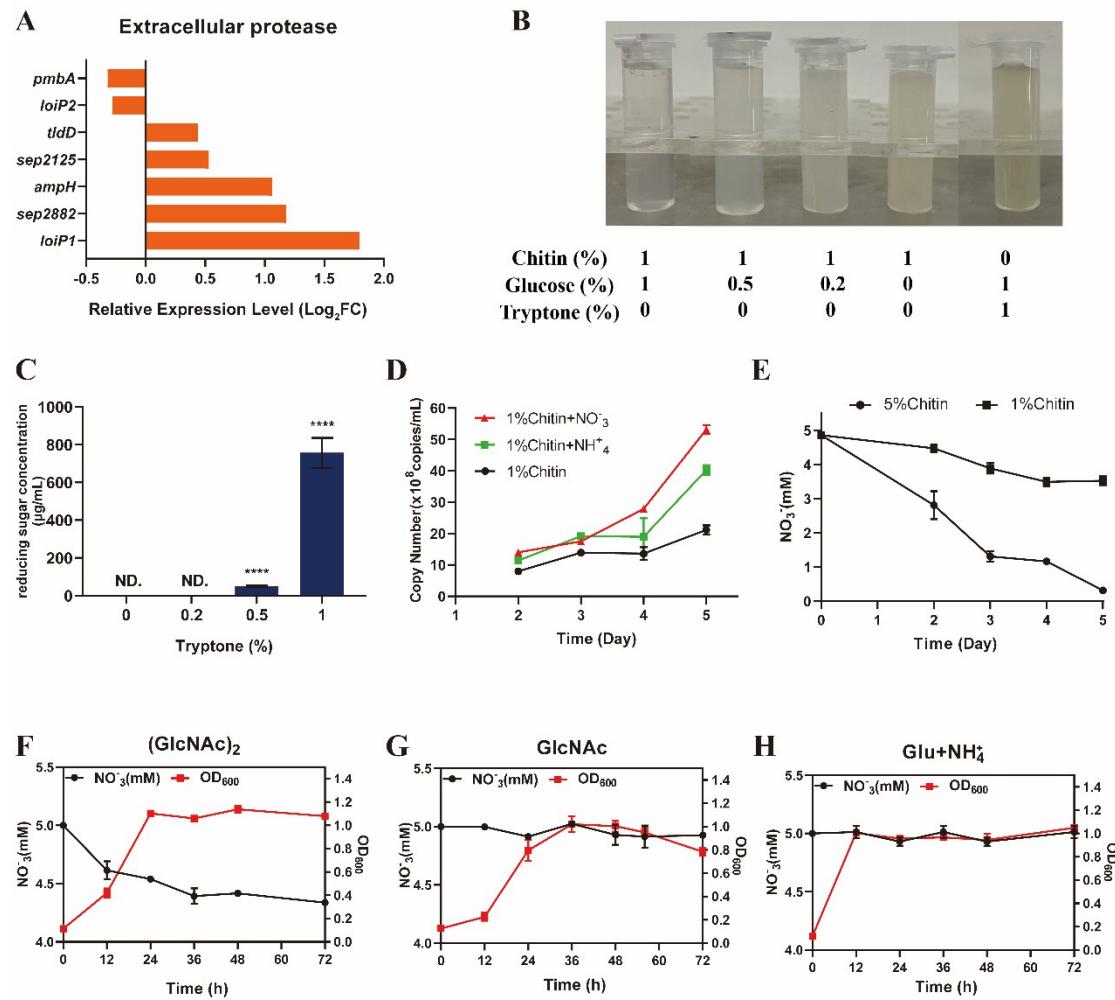

Supplementary Fig. 2. (A) After transferring new mediums, time course of SCUT-21 growth curve in 1% (w/v) chitin powder medium and basal medium; (B) After transferring new mediums time course of chitinase activity produced (tested by DMAB method) by SCUT-21 in 1%(w/v) chitin powder medium and basal medium; (C) Top 20 KEGG enrichment terms among DEGs. Circle size indicates the number of DEGs, while the color indicates p value.

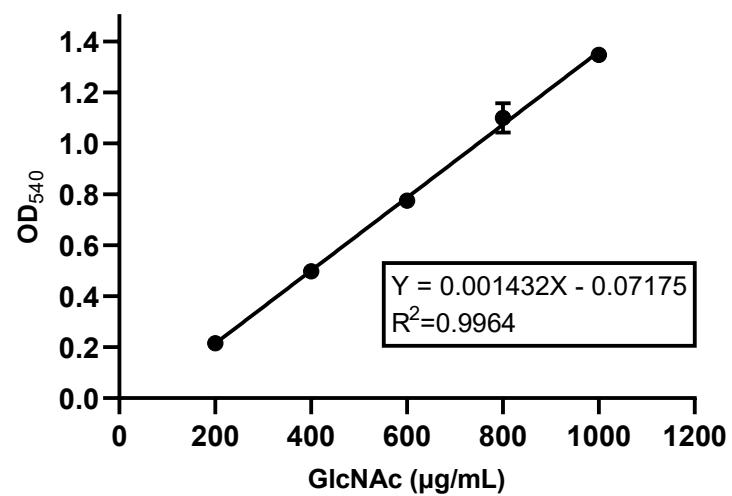

Supplementary Fig. 3. (A) Domain organization of chitinolytic enzymes. Protein domains, as identified with InterProScan data-bases are shown. SP, Singal Peptide; GH18_Cat, Glycoside Hydrolase family 18 Catalytic Domain; GH19_Cat, Glycoside Hydrolase family 19 Catalytic Domain; GH20_Cat, Glycoside Hydrolase family 20 Catalytic Domain; CBM, Carbohydrate-binding module; CE4, carbohydrate esterase 4 (CE4) superfamily; AA10, Auxiliary Activity family 10 (B) Phylogenetic analysis of GH18 chitinases in SCUT-21. The black dot-marked chitinases are from SCUT-21. (C) Enzymatic parameters of the four recombinant chitinases the optimal pH and the optimal temperature.

Supplementary Fig. 4. (A) Regulation of SCUT-21 extracellular protease genes identified by transcriptome analysis. (B) The turbidity of SCUT-21 in 1% chitin medium containing different concentration of tryptone and glucose (3 days). (C) Effect of different tryptone concentrations on the residual amount of reducing sugar in the culture medium determined by the DMAB method (5 days). (D) Time course of the SCUT-21 growth curve in 1% chitin medium containing different nitrogen sources. (E) Time course of residual nitrate of SCUT-21 in 1% and 5% chitin medium. Time course of residual nitrate (black) and growth curve (red) of SCUT-21 in the (GlcNAc)₂ medium (F), GlcNAc medium (G), and glucose + NH₄⁺ medium (H).

Supplementary Fig. 5. The DNS standard curve of *N*-acetylglucosamine.

assembly_00915	Heme exporter protein B (ccmB)	0.33
Ammonium metabolism		
assembly_01469	Ferredoxin-dependent glutamate synthase 1 (glu)	3.67
assembly_01468	Glutamate synthase [NADPH] small chain (gltD)	1.86

assembly_01464	Glutamate synthase [NADPH] small chain (gltD)	1.68
assembly_01465	Glutamate synthase [NADPH] large chain (gltB)	0.80
assembly_01000	Ammonia channel (Amt)	0.47
assembly_00782	Glutamine synthetase (glnA)	0.41
Pyrimidine and purine metabolism		
assembly_00015	Dihydroorotate dehydrogenase A (fumarate) (pyrD)	5.22
assembly_02440	Anaerobic ribonucleoside-triphosphate reductase (nrdD)	4.27
assembly_02439	Anaerobic ribonucleoside-triphosphate reductase-activating protein (nrdG)	1.57
assembly_01013	Methanol dehydrogenase activator (act)	1.44
assembly_01434	DNA-directed RNA polymerase subunit beta' (rpoB1)	1.39
assembly_00215	5'-nucleotidase (surE)	1.39
assembly_03137	Deoxyguanosinetriphosphate triphosphohydrolase (dgt)	1.33
assembly_01404	DNA-directed RNA polymerase subunit alpha (rpoA)	1.15
assembly_01435	DNA-directed RNA polymerase subunit beta (rpoB2)	1.10
assembly_03136	Ribonucleoside-diphosphate reductase subunit beta (nrdB)	1.05
assembly_01457	Exopolyphosphatase (ppx)	1.04
assembly_01017	Phosphoglucomutase (algC)	0.83
assembly_01475	Phosphoribosylamine--glycine ligase (purD)	0.77
assembly_02681	Formate-dependent phosphoribosylglycinamide formyltransferase (purT)	0.69
assembly_02684	Putative bifunctional exonuclease/endonuclease protein	0.56
assembly_02703	Adenylate kinase (adk)	0.53
assembly_01158	DNA polymerase III PolC-type (polC)	0.50

Amino Acids biosynthesis		
assembly_00034	5-methyltetrahydropteroylglutamate--homocysteine methyltransferase (metE)	4.09
assembly_01356	2-isopropylmalate synthase (leuA)	2.81
assembly_00555	3-isopropylmalate dehydrogenase (leuB)	2.76
assembly_00275	Cyclohexadienyl dehydrogenase (tyrC)	1.79
assembly_00210	LL-diaminopimelate aminotransferase (argD)	1.44
assembly_00033	HTH-type transcriptional regulator (metR)	1.39
assembly_01351	Ketol-acid reductoisomerase (NADP (+)) (ilvC)	1.13
assembly_01350	Acetolactate synthase isozyme 3 small subunit (ilvH)	1.04
assembly_00482	Diaminopimelate epimerase (dapF)	0.95
assembly_01349	Acetolactate synthase isozyme 3 large subunit (ilvI)	0.84
assembly_01869	Phospho-2-dehydro-3-deoxyheptonate aldolase, Phenol-sensitive (aroG)	0.76
assembly_00593	Indole-3-glycerol phosphate synthase (trpC)	0.75
assembly_00589	Anthranilate synthase component 1 (trpE)	0.63
assembly_03209	P-protein	0.62
assembly_00211	2,3,4,5-tetrahydropyridine-2,6-dicarboxylate N-succinyltransferase (dapD)	0.62
assembly_01648	4-hydroxy-tetrahydrodipicolinate reductase (dapB)	0.54
assembly_02887	Homoserine dehydrogenase (metM)	0.54
assembly_02804	3-phosphoshikimate 1-carboxyvinyltransferase (aroA)	0.52
assembly_00557	3-isopropylmalate dehydratase small subunit 1 (leuD)	0.49
Ribosomal protein		
assembly_01405	30S ribosomal protein S4	1.73
assembly_01437	50S ribosomal protein L10	1.59
assembly_01434	DNA-directed RNA polymerase subunit beta'	1.39
assembly_01404	DNA-directed RNA polymerase subunit alpha	1.15

assembly_01435	DNA-directed RNA polymerase subunit beta	1.10
assembly_01422	30S ribosomal protein S3	1.06
assembly_01406	30S ribosomal protein S11	0.97
assembly_01421	50S ribosomal protein L16	0.92
assembly_01411	30S ribosomal protein S5	0.75
assembly_01436	50S ribosomal protein L7/L12	0.73
assembly_01420	50S ribosomal protein L29	0.61
assembly_01409	50S ribosomal protein L15	0.58
Proteases		
assembly_01739	Metalloprotease (loiP1)	1.80
assembly_02882	putative zinc protease (sep2882)	1.18
assembly_00459	D-alanyl-D-alanine endopeptidase (ampH)	1.06
assembly_02125	Extracellular basic protease (sep2125)	0.53
assembly_00723	Metalloprotease (tldD)	0.44
assembly_01928	Metalloprotease (loiP2)	-0.28
assembly_00012	Metalloprotease (pmbA)	-0.32

Table S9. Significantly differentially expressed other genes in chitin powder medium, compared

with Basal medium, cultured SCUT-21.

Gene ID	Description	$\log_2 FC$
Regulator factor		
assembly_00427	Putative anti-sigma factor antagonist	5.46
assembly_01709	Response regulator (pleD)	4.11
assembly_00212	RNA polymerase sigma factor (rpoS)	2.27
assembly_01348	RNA polymerase sigma factor (sigV)	1.30
assembly_00770	ATP-dependent Clp protease ATP-binding subunit (clpX)	0.91
assembly_00771	ATP-dependent Clp protease proteolytic subunit (clpP)	0.72
assembly_01154	HTH-type transcriptional regulator (yofA)	1.70
assembly_02657	HTH-type transcriptional regulator (gntR)	1.54
assembly_00033	HTH-type transcriptional regulator (metR)	1.39
assembly_01618	Response regulator (mprA)	1.35
assembly_02493	DNA-binding transcriptional regulator (ntrC)	1.32
assembly_01819	HTH-type transcriptional regulator (pgrR)	1.13
assembly_01984	Response regulator protein (vraR)	1.01
assembly_00906	Nitrate/nitrite response regulator protein (narL)	0.99
assembly_02002	HTH-type transcriptional regulator (dmlR)	0.88
assembly_02351	putative HTH-type transcriptional regulator (yfiR)	0.81
assembly_00620	HTH-type transcriptional regulator (argP)	0.74
assembly_00783	Response regulator (pleD)	0.73
assembly_01286	Response regulator (pleD)	0.71
assembly_01874	HTH-type transcriptional regulator (dmlR)	0.64
assembly_02088	HTH-type transcriptional regulator (cysL)	0.62
assembly_00107	putative HTH-type transcriptional regulator (yttP)	0.50

assembly_02949	Chemotaxis response regulator protein-glutamate methylesterase	0.50
assembly_02245	RNA polymerase sigma factor (rpoH)	-1.24
assembly_03157	Sigma factor AlgU regulatory protein (mucB)	-1.80
assembly_03156	Anti-sigma-E factor (rseA)	-2.14
Secretion system		
Type I secretion system		
assembly_00354	Hemolysin secretion protein D (hlyD)	2.66
assembly_00351	Alpha-hemolysin translocation ATP-binding protein (hlyB)	1.06
Type II secretion system		
assembly_02331	Type II secretion system protein I (gspI)	4.52
assembly_03027	Type II secretion system protein D (gspD)	1.78
assembly_01525	Putative type II secretion system protein F (gspF1)	1.20
assembly_03026	Type II secretion system protein G (gspG)	1.19
assembly_03033	Putative type II secretion system protein F (gspF2)	0.94
assembly_03025	Type II secretion system protein G (gspG)	0.84
assembly_03032	putative type II secretion system protein (hxcR)	0.84
assembly_02332	Type II secretion system protein J (gspJ)	0.75
assembly_02327	Putative type II secretion system protein F (gspF)	0.54
Tat secretion system		
assembly_01562	Sec-independent protein translocase protein (tatA)	2.66
assembly_01563	Sec-independent protein translocase protein (tatB)	1.25
assembly_01560	Sec-independent protein translocase protein (tatC)	0.45
