**Figure S1.** Cross-sectional SEM images of all prepared BiVO<sub>4</sub> films and BiVO<sub>4</sub> seed.

**Figure S2.** SEM images and EDS mappings of Bi, V and O in all BiVO<sub>4</sub> films prepared using different solvents and BiVO<sub>4</sub> seed.

**Figure S3.** EPR spectra of all BiVO<sub>4</sub> film prepared using various solvents and BiVO<sub>4</sub> seed.

**Table S1.** Binding energies obtained from deconvolution of core-level XPS spectra of Bi 4f, V 2p and O 1s.

| Samples                | Binding energies (eV) |                      |      |                |                 |                  |                     |                     |               |
|------------------------|-----------------------|----------------------|------|----------------|-----------------|------------------|---------------------|---------------------|---------------|
|                        | Bi 4f                 |                      |      | O 1s           |                 |                  | V 2p                |                     |               |
|                        | Bi 4f <sub>7/2</sub>  | Bi 4f <sub>5/2</sub> | Δ    | O <sub>I</sub> | O <sub>II</sub> | O <sub>III</sub> | V 2p <sub>3/2</sub> | V 2p <sub>1/2</sub> | Δ             |
