

The supporting information contains the following contents:

Figure S1 The correlation of $P_A\%$ with $P_{ms}\%$.

Figure S2 Partial least squares model applied to the research of the relationship between fingerprint and antioxidant activity. Y observed versus Y predicted plot for the calibration model of HPLC (A) and prediction mode of HPLC (B), Y observed versus Y predicted plot for the calibration model of UV quantum fingerprint (C) and prediction mode of UV quantum fingerprint (D).

Table S1 Absorption coefficient spectrum results of 21 batches of samples.

Table S2 The calibration curves, linear range, LOD, LOQ for FA, RT and PR.

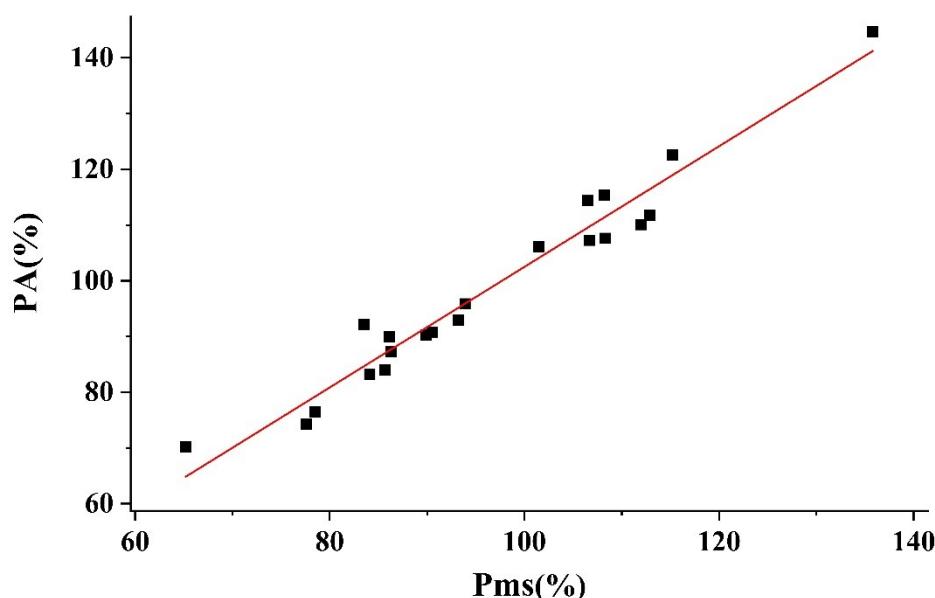

Figure S1 The correlation of $P_A\%$ with $P_{ms}\%$

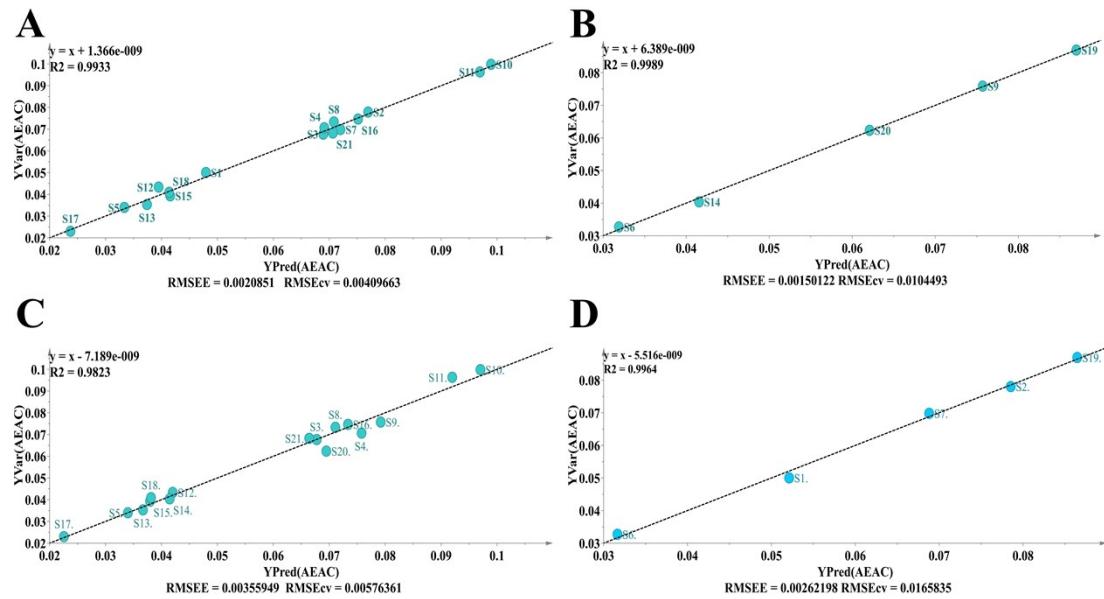

Figure S2 Partial least squares model applied to the research of the relationship between fingerprint and antioxidant activity. Y observed versus Y predicted plot for the calibration model of HPLC (A) and prediction mode of HPLC (B), Y observed versus Y predicted plot for the calibration model of UV quantum fingerprint (C) and prediction mode of UV quantum fingerprint (D).

Table S1 Absorption coefficient spectrum results of 21 batches of samples

Table S2 The calibration curves, linear range, LOD, LOQ for FA, RT and PR.

Analyte	Calibration curve	r	Linear range ($\mu\text{g/mL}$)	LOD ^a ($\mu\text{g ml}^{-1}$)	LOQ ^b ($\mu\text{g ml}^{-1}$)
FA	$y = 1084.6x - 91.302$	0.9991	69.21 ~ 209.72	69.207	209.72
RT	$y = 104.43x + 10.646$	0.9999	2.12 ~ 6.42	2.118	6.418
PR	$y = 34.873x + 4.4195$	0.9991	3.64 ~ 11.02	3.637	11.021

a LOD: limit of detection.

b LOQ: limit of quantification.
