## **1. General procedure for the synthesis of alkyl 2-aminobenzo[d]thiazole-6-carboxylates (2a-i)**

2-Aminobenzo[*d*]thiazole-6-carboxylic esters (**2a-i**) were prepared from 4-aminobenzoic acid (**1a-i**) and appropriate alcohols by modifying literature synthetic procedure.[1, 2] To a solution of appropriate ester 4-aminobenzoates (**2a-i**, 0.1 mol) in glacial acetic acid (100 mL), ammonium thiocyanate (0.2 mol, 15.2 g) was added with stirring in ice bath. The reaction mixture was cooled to 5°C, and a solution of bromine (4.8 mL, 0.093 mol) in acetic acid (25 mL) was added dropwise with stirring. A yellow suspension was appeared. The reaction mixture was then stirred at room temperature for 30 min more. The yellow precipitates were filtered and dissolved in cold water (100 mL). The obtained solution was neutralized using 25% ammonia solution to pH 8. The product was filtered, washed by cold water, and crystallized from 96% ethanol to afford the titled 2-aminobenzo[*d*]thiazoles **3a-i** that were displayed as follows.

### *Methyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3a)*

Pale-yellow crystals from methyl *p*-aminobenzoate (**2a**, 0.1 mol, 15.1 g). Yield: 11.6 g (56%); M.p.: 192–193°C, ref. [3]: 193°C.

### *Ethyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3b)*

Pale-yellow crystals from ethyl *p*-aminobenzoate (**2b**, 0.1 mol, 16.5 g). Yield: 11 g (50%); M.p.: 243–245°C, ref. [3]: 244–245°C.

### *Propyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3c)*

Pale-yellow crystals from *n*-propyl *p*-aminobenzoate (**2c**, 0.1 mol, 17.9 g). Yield: 17.5 g (74%); M.p.: 208–209°C, ref. [3]: 209°C.

### *Isopropyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3d)*

Pale-yellow crystals from isopropyl *p*-aminobenzoate (**2d**, 0.1 mol, 17.9 g). Yield: 16. g (68%); M.p.: 206–208°C, ref. [3]: 208°C.

### *Butyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3e)*

Pale-yellow crystals from *n*-butyl *p*-aminobenzoate (**2e**, 0.1 mol, 19.3 g). Yield: 16.5 g (66%); M.p.: 205–206°C, ref. [3]: 206°C.

### *Isobutyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3f)*

Pale-yellow crystals from isobutyl *p*-aminobenzoate (**2f**, 0.1 mol, 19.3 g). Yield: 17.0 g (68%); M.p.: 187–188°C.

### *Pentyl 2-aminobenzo[*d*]thiazole-6-carboxylate (3g)*

Pale-yellow crystals from *n*-pentyl *p*-aminobenzoate (**2g**, 0.1 mol, 20.7 g). Yield: 19.0 g (72%); M.p.: 190–192°C.

*Isopentyl 2-aminobenzo[d]thiazole-6-carboxylate (3h)*

Pale-yellow crystals from isopentyl *p*-aminobenzoate (**2h**, 0.1 mol, 20.7 g). Yield: 18.5 g (70%); M.p.: 188–189°C.

*Octyl 2-aminobenzo[d]thiazole-6-carboxylate (3i)*

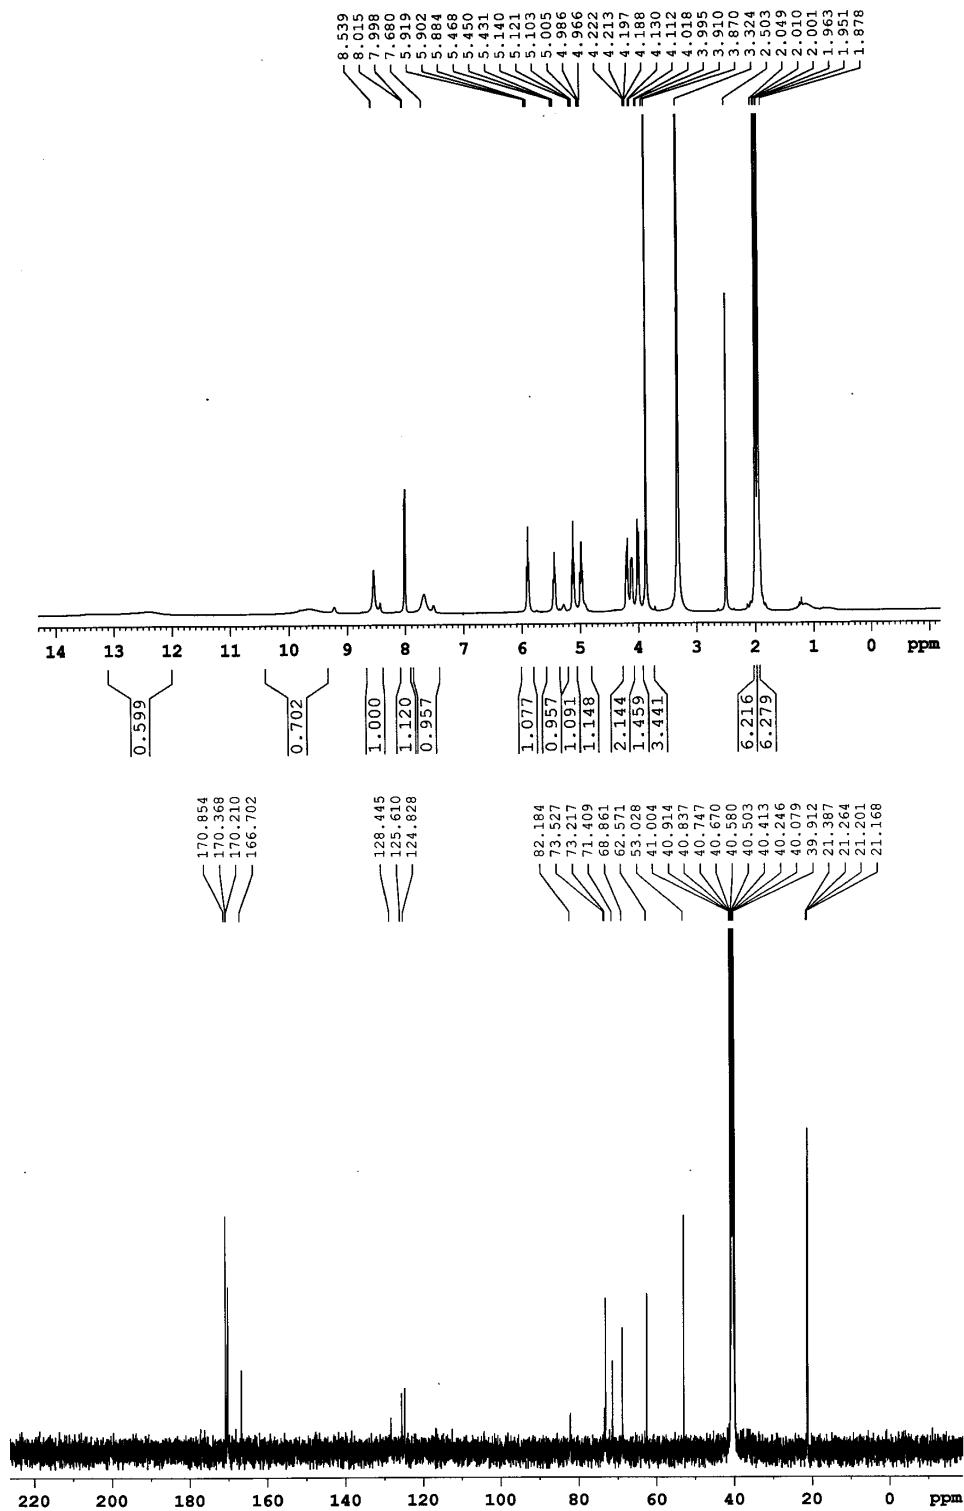

Pale-yellow crystals from octyl *p*-aminobenzoate (**2i**, 0.1 mol, 20.7 g). Yield: 15.9 g (52%); M.p.: 160–162°C.
