Figure S1: PL spectrum of Er-BTO in the visible 500-700 nm range showing green bands are much stronger than the red ones located around 650 nm.

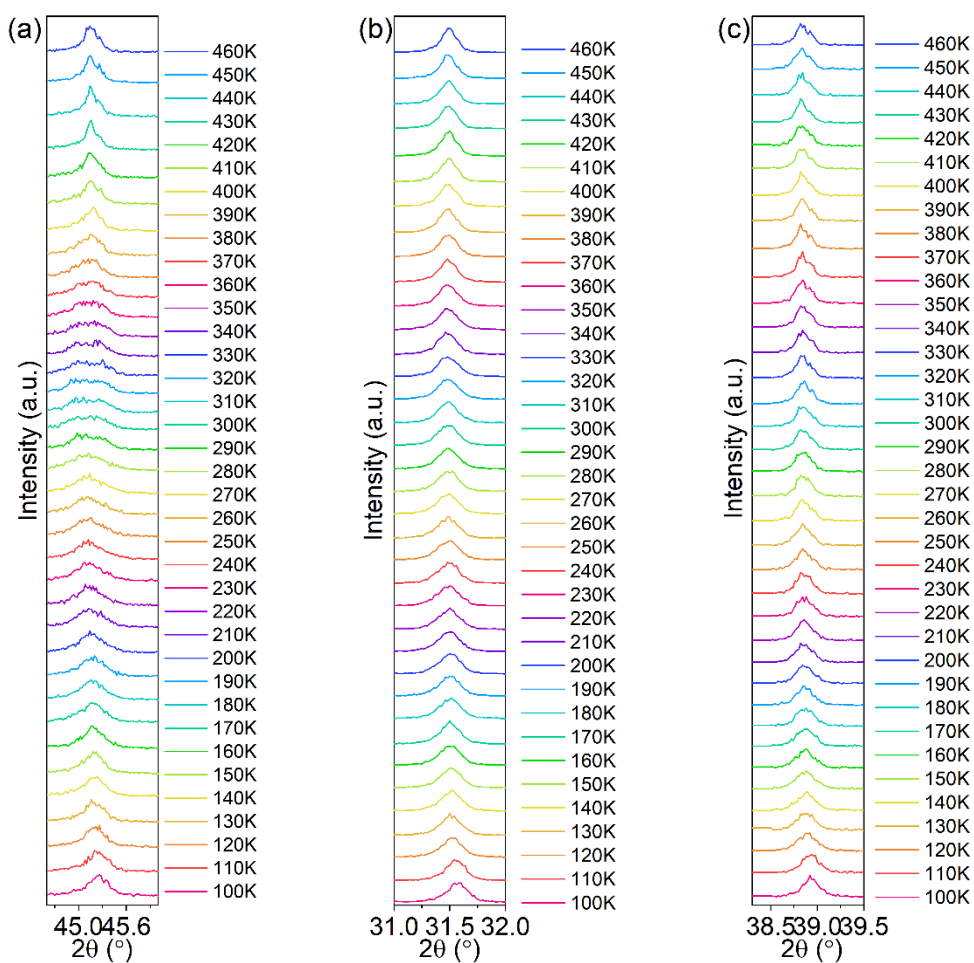

Figure S2: Temperature dependent XRD patterns around the {200}, {110}, {111} diffraction peaks (around $2\theta=45^\circ$, 31.5° and 39° , respectively) of Er-BTO.
