Figure S10. View of the Hirshfeld surface for $[\text{Co}_{16}(\text{OH})_4(\text{ib})_{20}(\text{thme})_2(\text{Hthme})_2(\text{H}_2\text{O})_6]$ cluster in 1 colour-coded with different properties.

Figure S11. View of the Hirshfeld surface for $[\text{Co}_{16}(\text{OH})_4(\text{ib})_{20}(\text{thmp})_2(\text{Hthmp})_2(\text{H}_2\text{O})_6]$ cluster in 2 colour-coded with different properties.

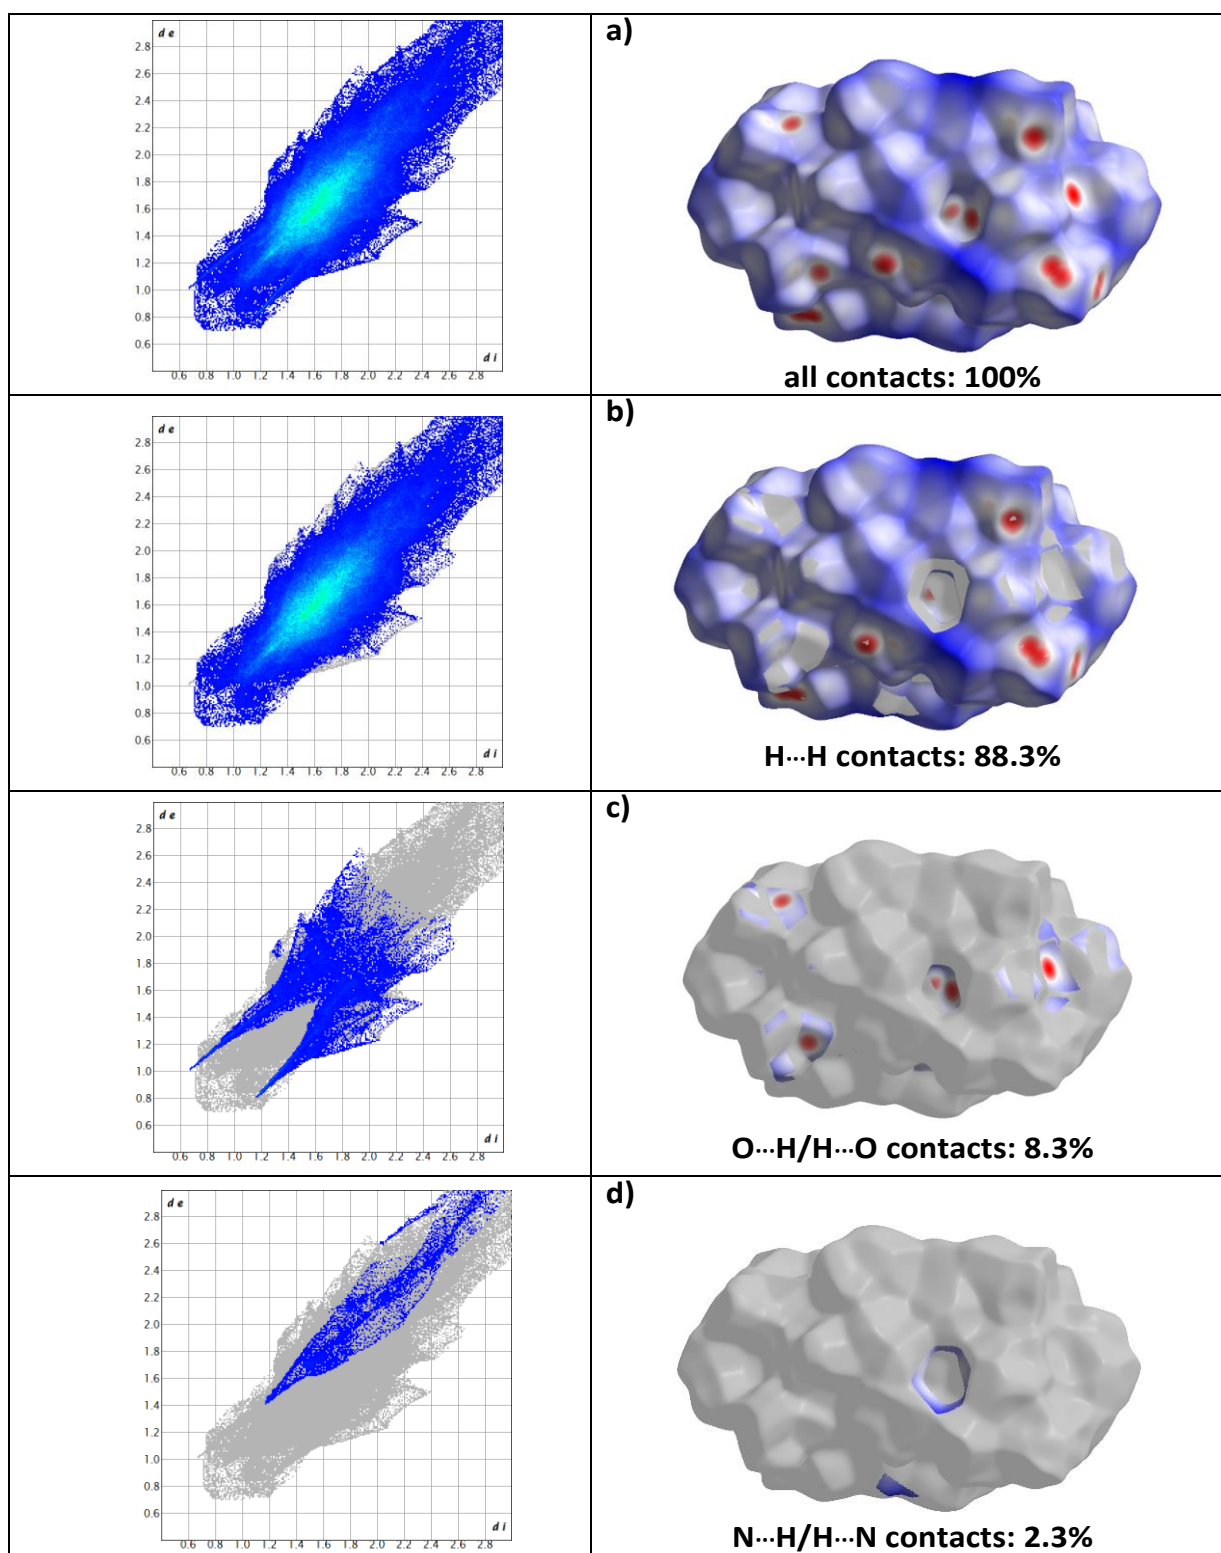

Figure S12. 2D fingerprint plots (d_e vs. d_i) and d_{norm} surface plots of the $\{\text{Co}_{16}\}$ cluster in **2**. Short contacts are represented by red areas, long contacts by blue areas, and the white area represents contacts with lengths equivalent to the sum of the van der Waal radii of the interacting atoms. a) d_{norm} distribution of all interactions, b) H...H, c) O...H/H...O, and d) N...H/H...N contacts. Surfaces to the right highlight the relevant d_{norm} surface patches associated with the specific contacts. The percentage of contribution is specified for each contact.
