CTAB Assisted Hydrothermal Synthesis of Oxygen Vacancy Enriched BiVO₄ for Enhanced Photocatalytic Hydrogen Production Qingan Sun, Fen Qiao, Taihang Zhou School of Energy & Power Engineering, Jiangsu University, Zhen Jiang, 212031, P.R.China

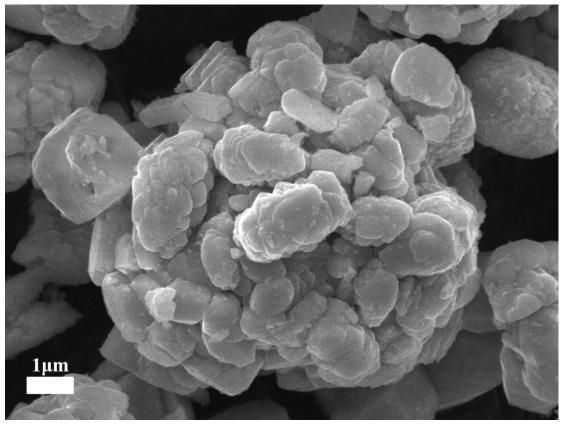

Figure S1 SEM images of BVO sample.

The morphology of $BiVO_4$ samples without CTAB was characterized by scanning electron microscopy (SEM), as shown in Figure S1. The microstructure of BVO samples appears as rough spheres with a size of approximately 6-7µm, which can be clearly observed to be composed of small balls with a size of approximately 1-2µm.
