

Electronic Supplementary Information

for

**Raman spectroscopic study of anhydrous and hydrous REE phosphates, oxides, and hydroxides**

Nicole C. Hurtig, Alexander P. Gysi, Sarah E. Smith-Schmitz and Daniel Harlov

Supplementary Materials:

- Table S2 summary tables with reference data in xlx format (ESI\_TableS2)
- Folder containing reference raw spectra for all solids measured in this study (Suppl\_rawfiles)
- Folder containing all Fityk files for peak deconvolution and fitting (Suppl\_Fit)

Electronic Supplementary Information comprises an additional literature data compilation summarized in Table S1 with more reference data listed in a separate excel file (ESI\_TableS2). We also provide a zip file (Suppl\_rawfiles) with raw data (txt) for all solids measured in this study as xy tables, which can be used with a variety of software packages for direct comparison of spectra. We further provide Fityk files with the peak deconvolution used in this study (Suppl\_Fit), which can be opened and viewed using the software package by Wojdyl (2010).

Table S1: Literature data compilation of previous Raman analyses for REE oxides, hydroxides and phosphates with more details given in the supplementary reference table (separate excel file).
