

## Chemicals

Folin-Ciocalteu reagent, gallic acid, quercetin, sodium sulphate, trans-cinnamaldehyde and trans-cinnamic acid were purchased from Sigma-Aldrich (Germany). Aluminum chloride, DMSO and potassium acetate were purchased from Carlo Erba (Germany). 2-Methyltetrahydrofuran (2-MeTHF), ethanol, dichloromethane (DCM), hexane, potassium chloride, sodium acetate and sodium carbonate were purchased from Merck (Germany). All chemicals were of analytical grade. Water was produced with Stakpure Omnia Type I Ultrapure Water Systems (Germany).
