Table S1. Screening of DIGI components of natural products based on ANN model

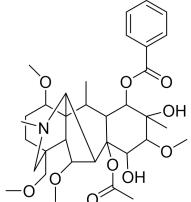

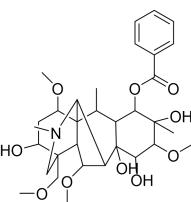

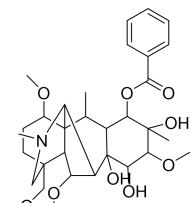

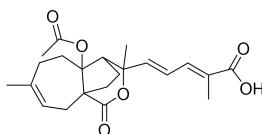

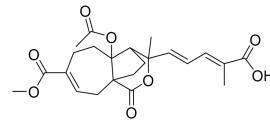

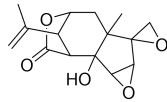

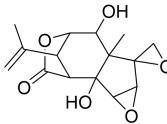

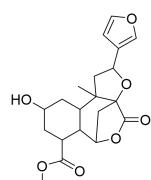

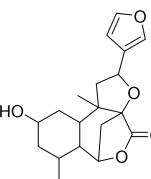

herbs	components	Compound structure
	Protoveratrine A	
Veratrum nigrum	Veratrosine	
	Veratramine	

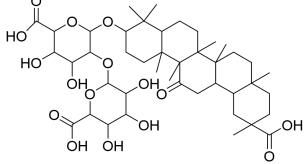

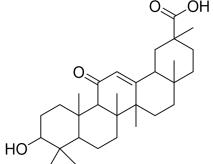

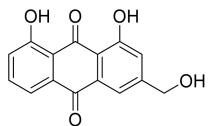

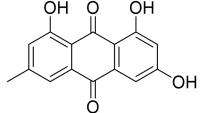

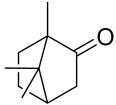

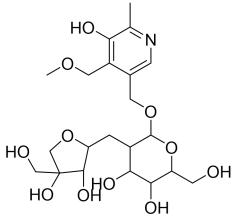

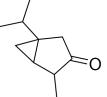

herbs	components	Compound structure
	Cyclopamine	
	Veratrine	
	Veratridine	
	Germerine	
	Neogermbudine	
Xanthii Fructus	Atractyloside	
	Carboxyatractyloside	
Ginkgo Semen	Ginkgolic acid	
	4'-O-Methylpyridoxine	
Radix Sophorae Flavescens	Kurarinone	

herbs	components	Compound structure
Psoralee Fructus	Psoralenoside	
	Isopsoralenoside	
Senecionis	Jacoline	
Scandentis Hebra	Jacobine	
	Adonifoline	
Phytolaccae Radix	Esculentoside A	
	Esculentoside B	
	Esculentoside C	
Polygoni Multiflori Radix	Gallic acid	

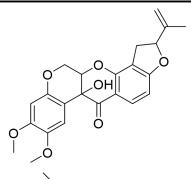

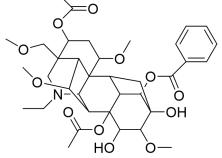

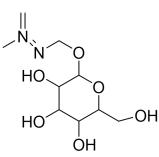

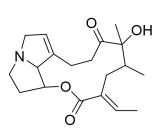

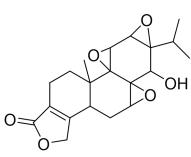

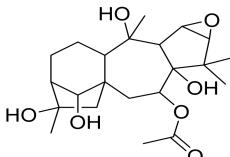

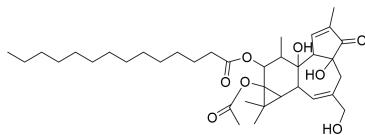

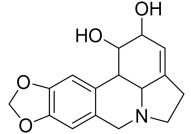

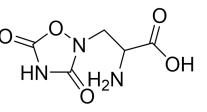

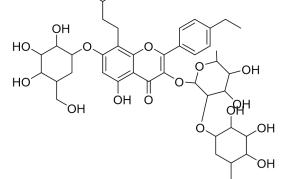

herbs	components	Compound structure
	Emodin- 8- O- glucoside	
	Emodin-8-O- β -D-glucopyranoside	
Rhei radix et rhizoma、Polygoni Multiflori Radix	Chrysophanol Physcion	
Sannae Folium	Rhein Sennoside A	
Kansui Radix	Sennoside B Kansuiphorin A	
Herb Of Common Peganum	Kansuiphorin B Harmine	

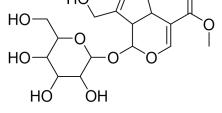

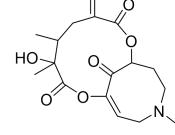

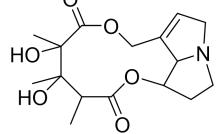

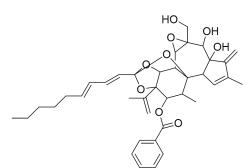

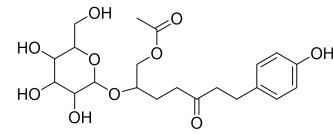

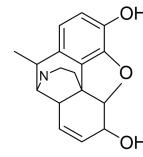

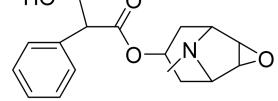

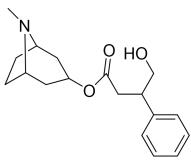

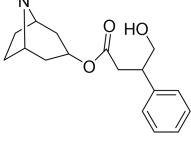

herbs	components	Compound structure
	Harmaline	
Gamboge	Gambogic acid	
	Gambogenic acid	
Catharanthus roseus L.	Vinblastine	
	Vinorelbine	
Andrographis Herba	Andrographolide	
Toosendan Fructus	Trichilinin D	
Aconiti Lateralis Radix Praeparata、 Aconiti Radix 、 Aconiti	Mesaconitine	

herbs	components	Compound structure
Kusnezoffii Radix、 Aconitum brachypodium Diels	Hypaconitine	
Aconiti Lateralis Radix Praeparata、 Aconiti Radix	Benzoylmesaconine	
	Benzoylhypaconitine	
Pseudolaricis Cortex	Pseudolaric acid A	
	Pseudolaric acid B	
Chinese Coriaria	Coriamyrtin	
	Tutin	
Dioscorea bulbifera	Diosbulbin A	
	Diosbulbin C	

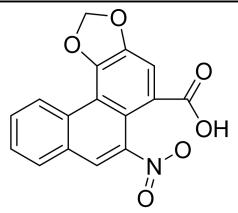

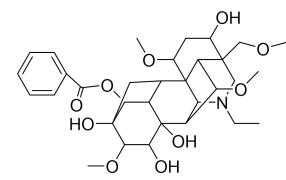

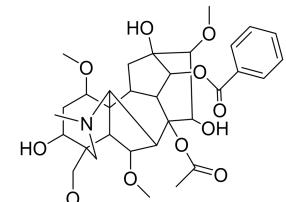

herbs	components	Compound structure
Glycyrrhizae Radix Rhizoma	Glycyrrhizic acid glycyrrhetic acid	 
Plumbago zeylanicaL.	Plumbagin	
Aloe、Rhei radix et rhizoma、 Polygoni Multiflori Radix Rhei radix et rhizoma、 Multiflori Radix、 Genkwa Flos 、 Kansui Radix Artemisiae Argyi Folium 、 Herba Asari Forbesii Albiziae Cortex	Aloe-emodin Emodin D-camphor Julibrine II	   
Artemisiae Argyi Folium	$\alpha$ -thujone	

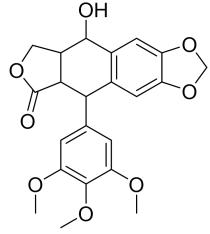

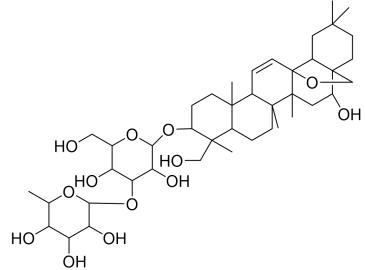

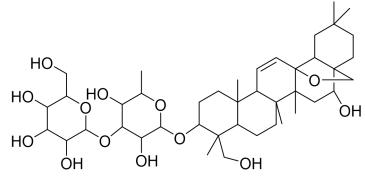

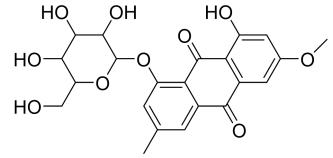

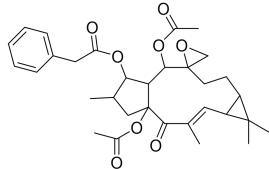

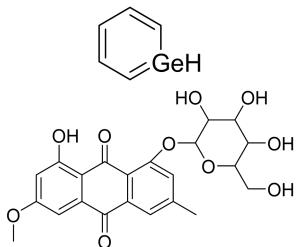

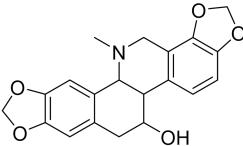

herbs	components	Compound structure
Picrasmae ramulus et folium	4-methoxy-5-hydroxy-canthin-6-one	
Farfarae Flos	Retrorsine	
Castor bean	Ricinine	
Tripterygium	Wilforine	
Hypoglaucum		
Farfarae Flos Gynura Segetum Senecionis Scandentis Hebra	Senecionine	
Common	Celastrol	
Threewingnut Root		
Sophorae Tonkinensis Radix et Rhizoma	Sophoranone	
Verbena Herba	Lycopsamine	
Sinomenii Caulis	Sinomenine	
Komarov Swallowwort	2,2,6,6-tetramethyl-4-piperidone	

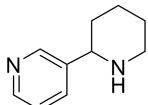

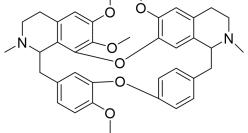

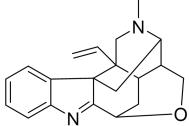

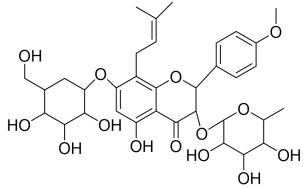

herbs		components	Compound structure
Seeds Pachyrhizus Erosus	Of	12 α -hydroxyrotenone	
Aconitum brachypodium Diels		3-acetylaconitine	
Cycas Seed		Cycasin	
Gynura Segetum		Integerrimine	
Tripterygium		Triptolide	
Hypoglaucum Common			
Threewingnut Root			
Rhododendri mollis flos		Rhodojaponin II	
Jatropha curcas		Phorbol ester	
Bulbus Lycoris Radiatae		Lycorine	
Quisqualis Fructus		Quisqualic acid	
Herba Epimedii		Epimedin C	

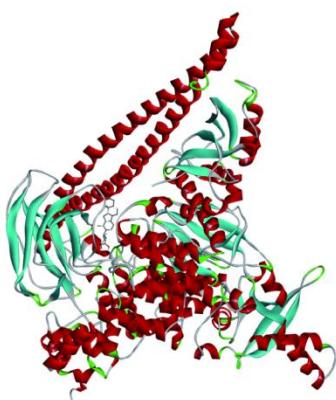

herbs	components	Compound structure
Gardeniae Fructus	Geniposide	
Farfarae Flos 、 Senecionis	Senkirkine	
Scendentis Hebra		
Herba Crotalariae、 Stem and Leaf of Assam Crotalaria	Monocrotaline	
Genkwa Flos	Yuanhuacin	
Frucrus Bruceae	Brusatol	
Opium 、 Papaveris Pericarpium	Morphine	
Daturaeflos 、 Physochlainae	Scopolamine	
Radix 、 Datura Seed 、 Folium		
Daturae Metelis		
Daturaeflos 、 Physochlainae	Hyoscyamine	
Radix、 Hyoscyami Semen 、 Datura Seed 、 Folium	Atropine	
Daturae Metelis		

herbs	components	Compound structure
Wooly	Aristolochic acid A	
Datchmanspipe		
Herb 、 Radix		
Aristolochiae		
Cinnabarinae 、		
Herba Asari		
Forbesii 、 Caulis		
aristolochiae		
manshuriensis 、		
Radix		
Aristolochiae		
Fangchi 、 Radix		
Aristolochiae 、		
Aristolo - chia		
fordiana Hemsl. 、		
Fructus		
Aristolochiae		
Gynura Segetum 、	Seneciphylline	
Senecionis		
Scandentis Hebra		
Aconitum	Yunaconitine	
Vilmorinianum		
Kom. 、 Aconitum		
brachypodium		
Diels 、 Aconitum		
vilmorinianum		

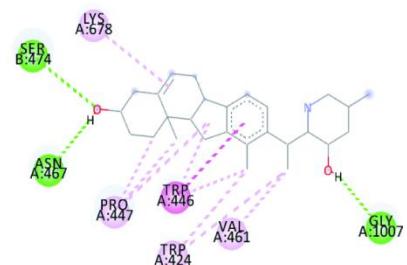

herbs	components	Compound structure
Radix Aristolochiae	Aristolochic acid B	
Cinnabarinae		
Caulis aristolochiae		
manshuriensis		
Radix Aristolochiae		
Fangchi		
Radix Aristolochiae		
Aconiti Lateralis	Benzoylaconine	
Radix Praeparata、		
Aconiti Radix		
Aconiti		
Kusnezoffii Radix		
Aconiti Lateralis	Aconitine	
Radix Praeparata、		
Aconiti Radix		
Aconiti		
Kusnezoffii Radix、		
Aconitum brachypodium		
Diels 、 Aconitum vilmorinianum		
Aconitum		
gymnandodrum		
Maxim.		

herbs	components	Compound structure
Sinopodophyllum hexandrum	Podophyllotoxin	
Dysosma versipellis		
Sinopodophylli Fructus		
Radix bupleuri		
	Saikogenin A	
	Saikogenin D	
Fallopia multiflora	Physcion-8-O-β-D-glucopyranoside	
Euphorbia lathyris L.	Euphorbia steroid	
Veratrum viride	Germine	
	Physcion-8-O-glucoside	
Chelidonium majus .L	Chelidonine	

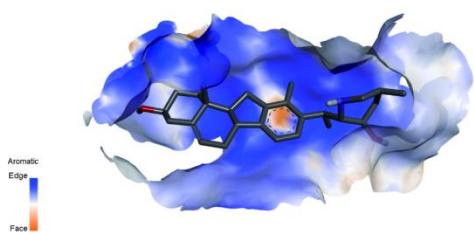

herbs	components	Compound structure
Anabasis aphylla	Anabasine	
Fourstamen		
Stephania Root	Tetrandrine	
Gelismium elegans	Koumine	
Icariine	Icariin	

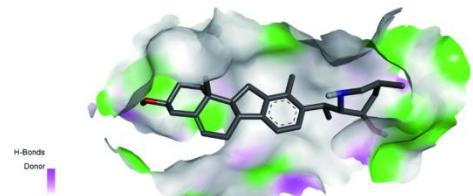

(a) 3D interaction structure of Veratramine with PIK3CA

(b) 2D interaction plane diagram of Veratramine with PIK3CA

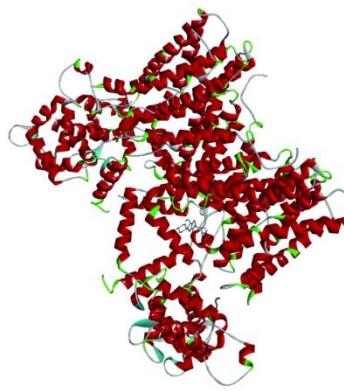

(c) Aromatic interactions between Veratramine and PIK3CA

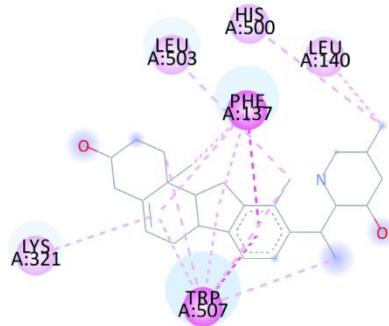

(d) Hydrogen bonding interactions between Veratramine and PIK3CA

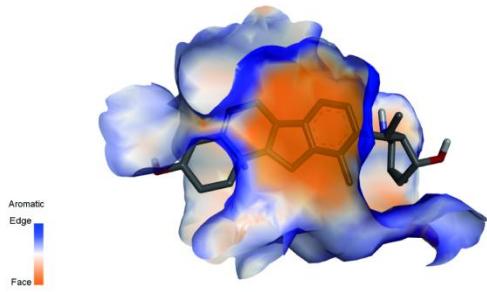

Figure S1. Docking results of Veratramine and PIK3CA molecule. Veratramine was semi-flexibly docked with the protein receptor PIK3CA. From the 2D interaction diagrams, it can be observed that the interacting amino acid residues primarily include ASN467, GLY1007, TRP446, PRO447, TRP424, VAL461, and LYS678. Among them, the oxygen atoms in the Veratramine structure form stable hydrogen bonds with ASN467 and GLY1007. The TRP446 residue engages in Pi-Pi interactions with the benzene ring of Veratramine. Furthermore, the ligand molecule forms Pi-Alkyl interactions with the PRO447, TRP424, and VAL461 residues.

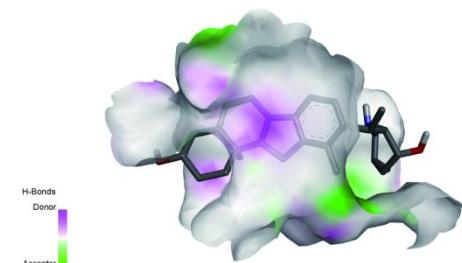

(a) 3D interaction structure of Veratramine with SLC9A3

(b) 2D interaction plane diagram of Veratramine with SLC9A3

(c) Aromatic interactions between Veratramine and SLC9A3

(d) Hydrogen bonding interactions between Veratramine and SLC9A3

Figure S2. Docking results of Veratramine and SLC9A3 molecule. Veratramine was semi-flexibly docked with the protein receptor SLC9A3. From the 2D interaction diagram, it can be seen that the interacting amino acid residues primarily include TRP507, PHE137, LYS321, LEU140, LEU503, and HIS500. The TRP507 and PHE137 residues engage in Pi-Pi interactions with the benzene ring of Veratramine. Additionally, the ligand molecule forms Pi-Alkyl interactions with the LYS321, LEU140, LEU503, and HIS500 residues.

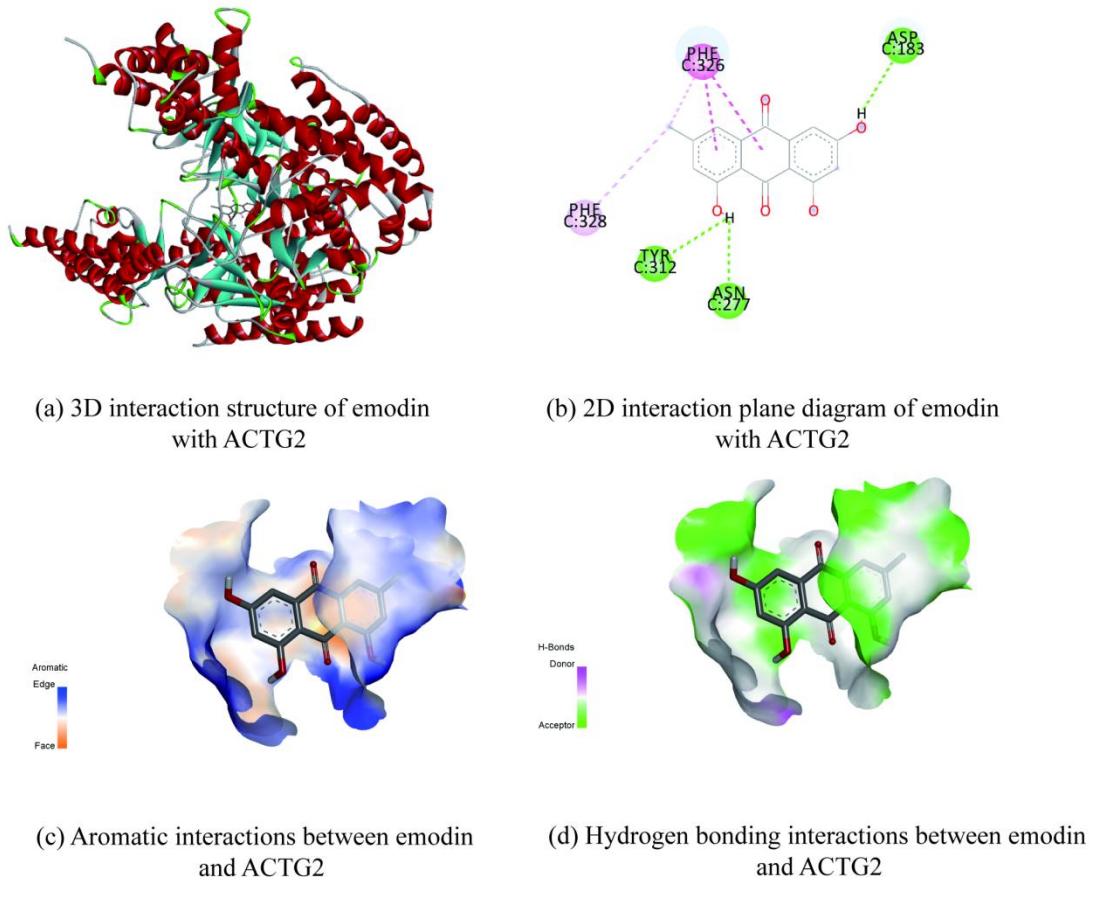

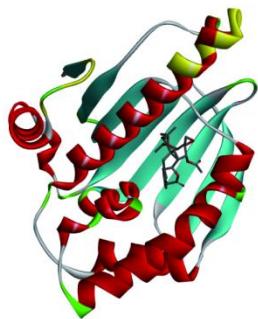

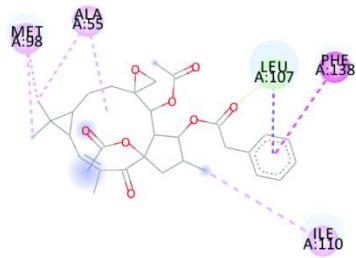

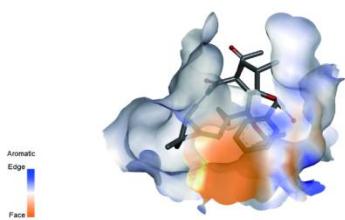

Figure S3. Docking results of emodin and ACTG2 molecule. Emodin was semi-flexibly docked with the protein receptor ACTG2. From the 2D interaction diagram, it can be observed that the interacting amino acid residues primarily include TYR312, ASN277, ASP183, PHE326, and PHE328. The TYR312, ASN277, and ASP183 residues form hydrogen bonds with the hydrogen atoms in the structure of emodin. The PHE326 residue engages in Pi-Pi interactions with the ligand molecule. Additionally, the ligand molecule forms Pi-Alkyl interactions with the PHE328 residue.

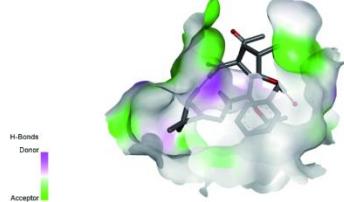

(a) 3D interaction structure of eupholiasteroid with HSP90AA1

(b) 2D interaction plane diagram of eupholiasteroid with HSP90AA1

(c) Aromatic interactions between eupholiasteroid and HSP90AA1

(d) Hydrogen bonding interactions between eupholiasteroid and HSP90AA1

Figure S4. Docking results of eupholiasteroid and HSP90AA1 molecule. Eupholiasteroid was semi-flexibly docked with the protein receptor HSP90AA1. From the 2D interaction diagram, it can be observed that the interacting amino acid residues primarily include LEU107, PHE138, MET98, ALA55, and ILE110. The oxygen atom in the structure of eupholiasteroid forms a stable hydrogen bond with LEU107. The PHE138 residue engages in Pi-Pi interactions with the benzene ring of eupholiasteroid. Additionally, the ligand molecule forms Alkyl interactions with the MET98, ALA55, and ILE110 residues.
