

Linking iron(III) carboxylates into high-nuclearity complexes by using Bis-tris

Alan Ferguson, Julie McGregor, Andrew Parkin and Mark Murrie

Supporting information

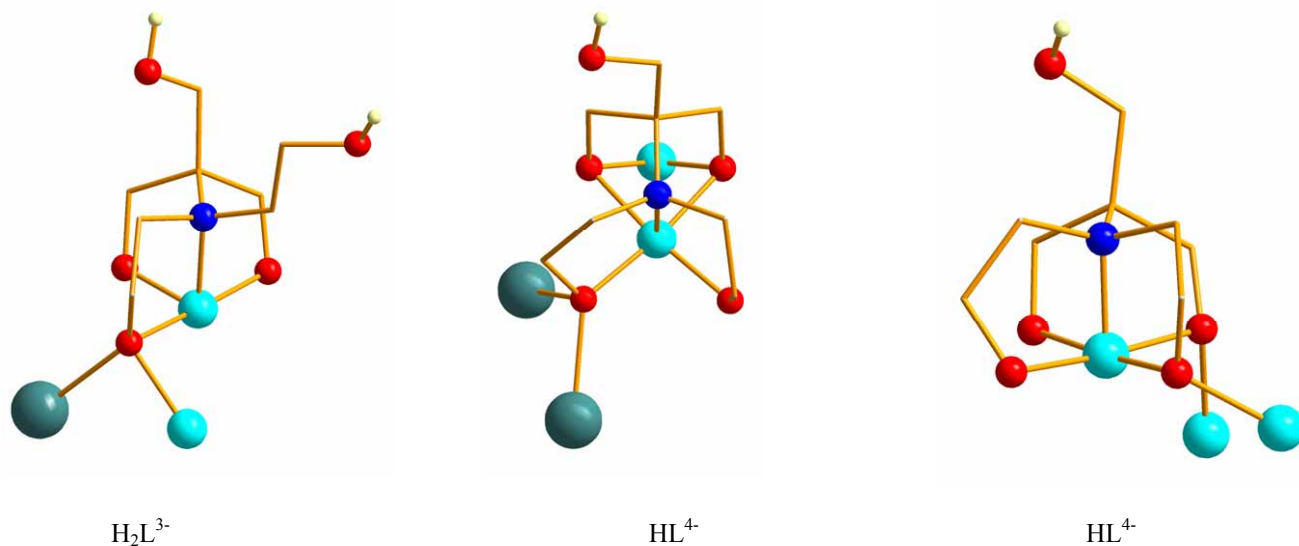

Fig. S1 Previously reported binding modes of deprotonated Bis-tris (Co, cyan; Na, blue-green; O, red; N, blue; C, rods). For further details, see A. Ferguson, A. Parkin and M. Murrie, *Dalton Trans.*, 2006, 3627.
