## Content:

### Figure Captions:

**Fig. S1** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT2 within one year (October 2010 to October 2011). OT2: 10 t/ha of biosolid applied in the plots every year since first application in October 2006.

**Fig. S2** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT3 within one year (October 2010 to October 2011). OT3: 20 t/ha of biosolid applied in the plots every year since first application in October 2006.

**Fig. S3** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT4 within one year (October 2010 to October 2011). OT4: 40 t/ha of biosolid applied in the plots every year since first application in October 2006.

**Fig. S4** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of NT3 within one year (October 2010 to October 2011). NT3: 20 t/ha of biosolid applied once in October 2010.

**Fig. S5** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of NT4 within one year (October 2010 to October 2011). NT4: 40 t/ha of biosolid applied once in October 2010.

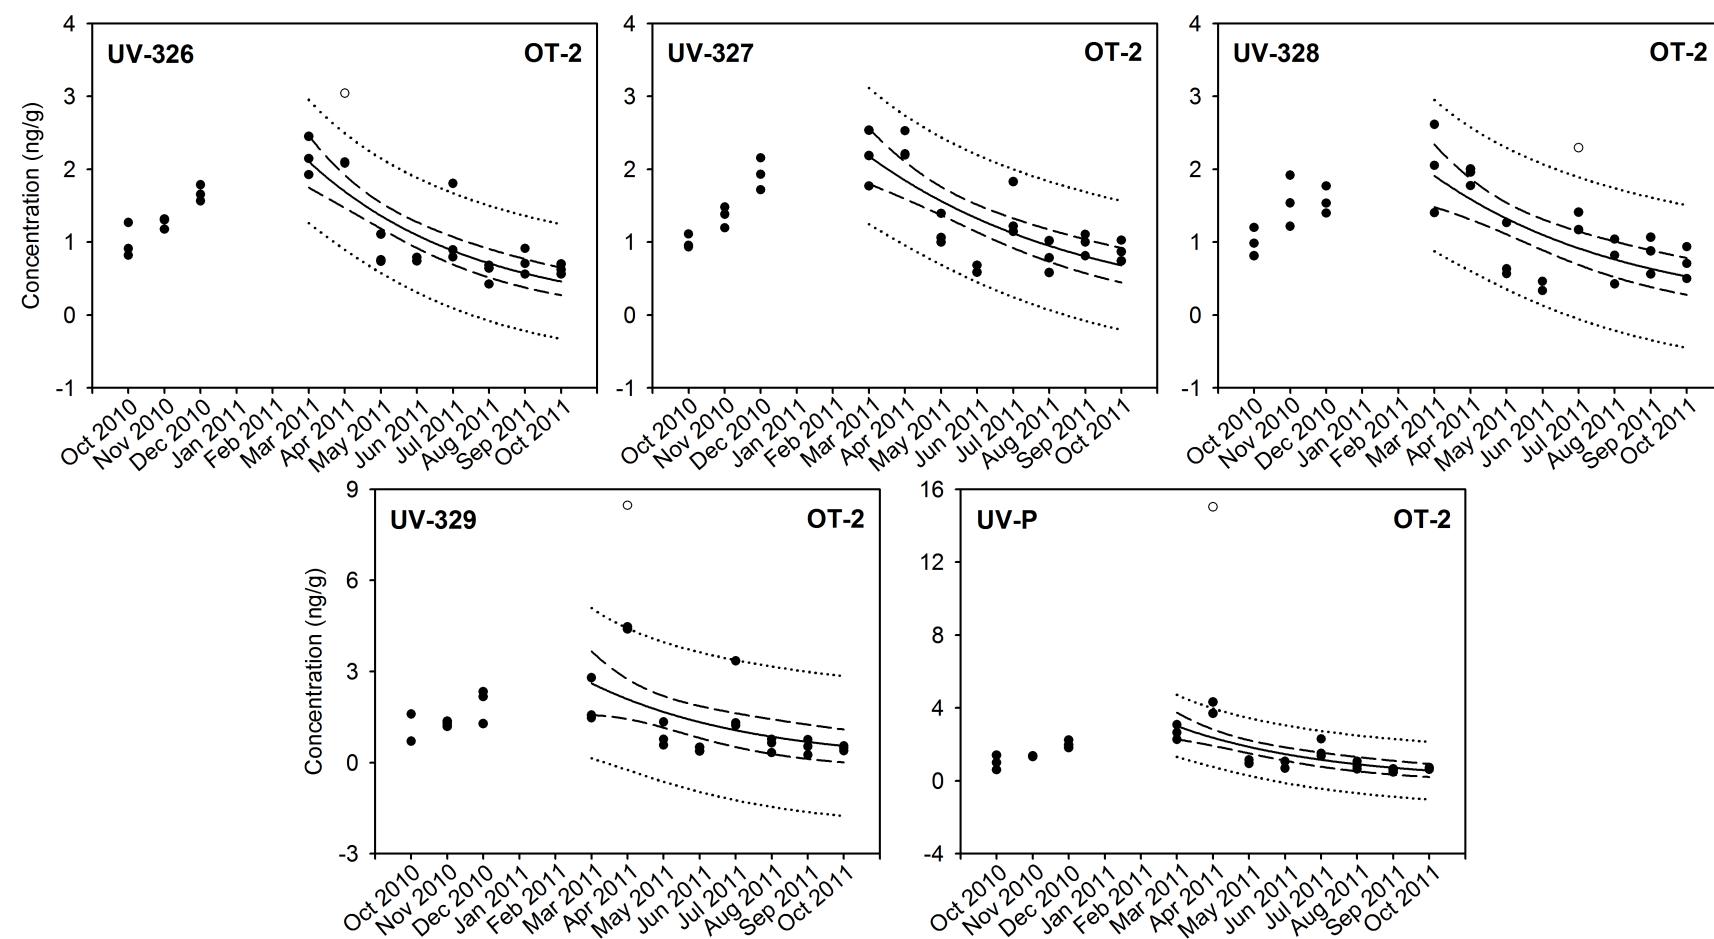

### Table Captions:

**Table S1** Characteristic ions and retention times for target compounds in GC-MS.

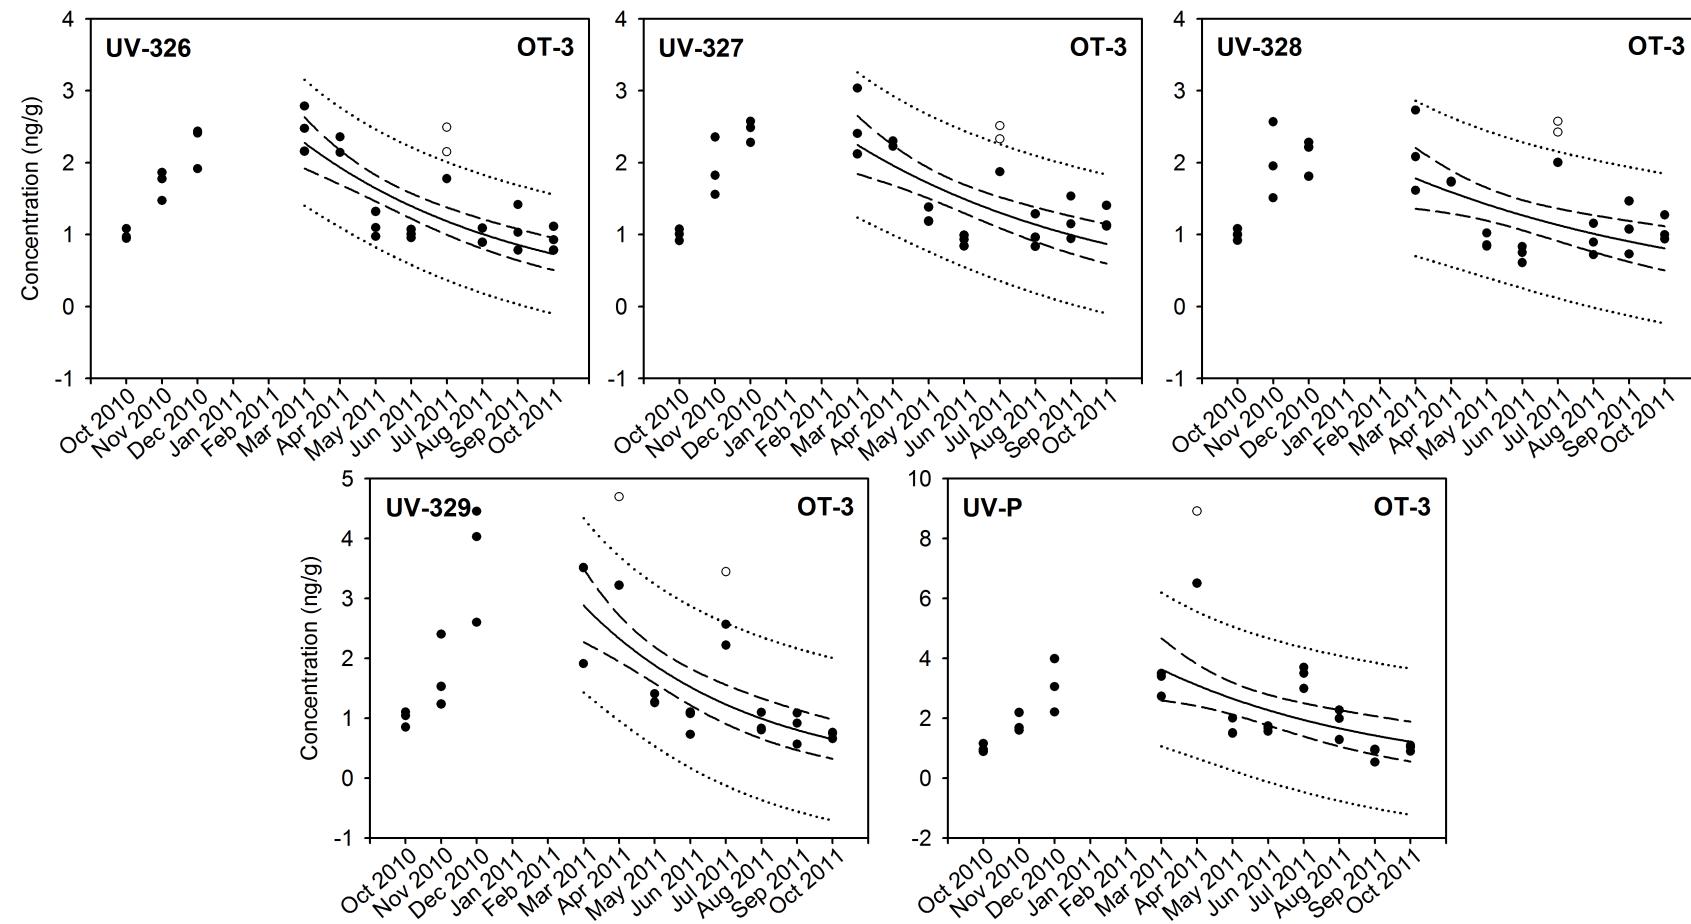

**Table S2** Recoveries (%) and method precision (RSD % for n = 3), limits of detection (LOD) and quantitation (LOQ) for target compounds.

**Table S3** Concentrations of BUVSs in the biosolid-amended soils of the old group (OT1, OT2, OT3 and OT4) for one year monitoring.

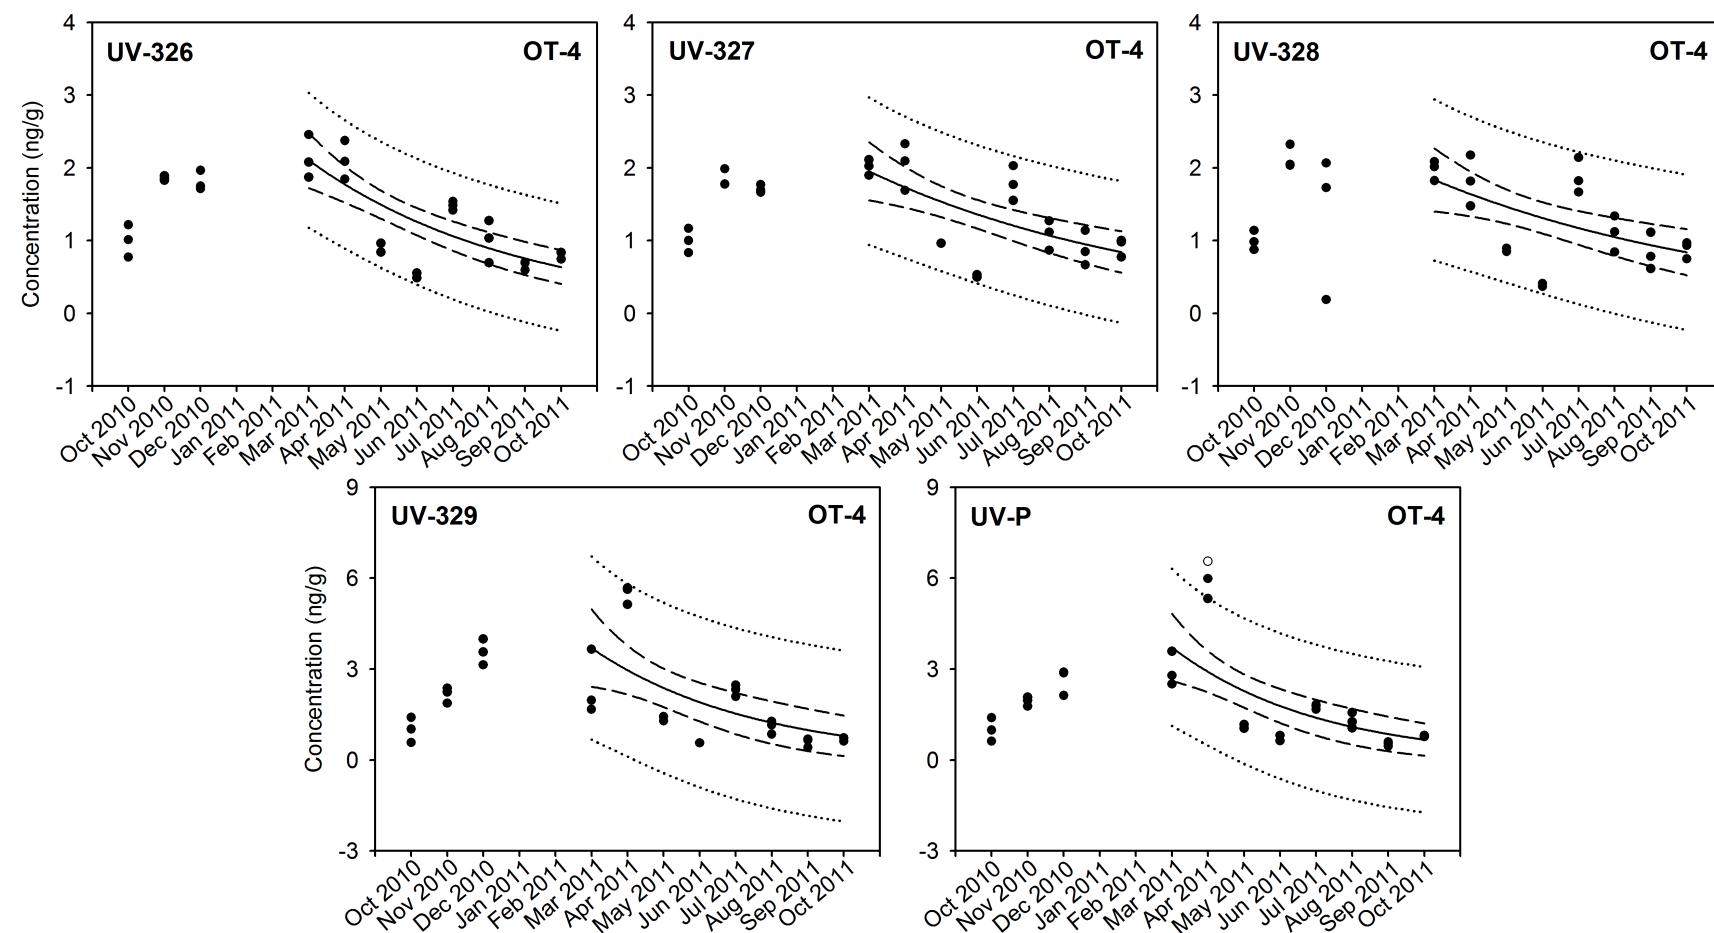

**Table S4** Concentrations of BUVSs in the biosolid-amended soils of the new group (NT2, NT3 and NT4) for one year monitoring.

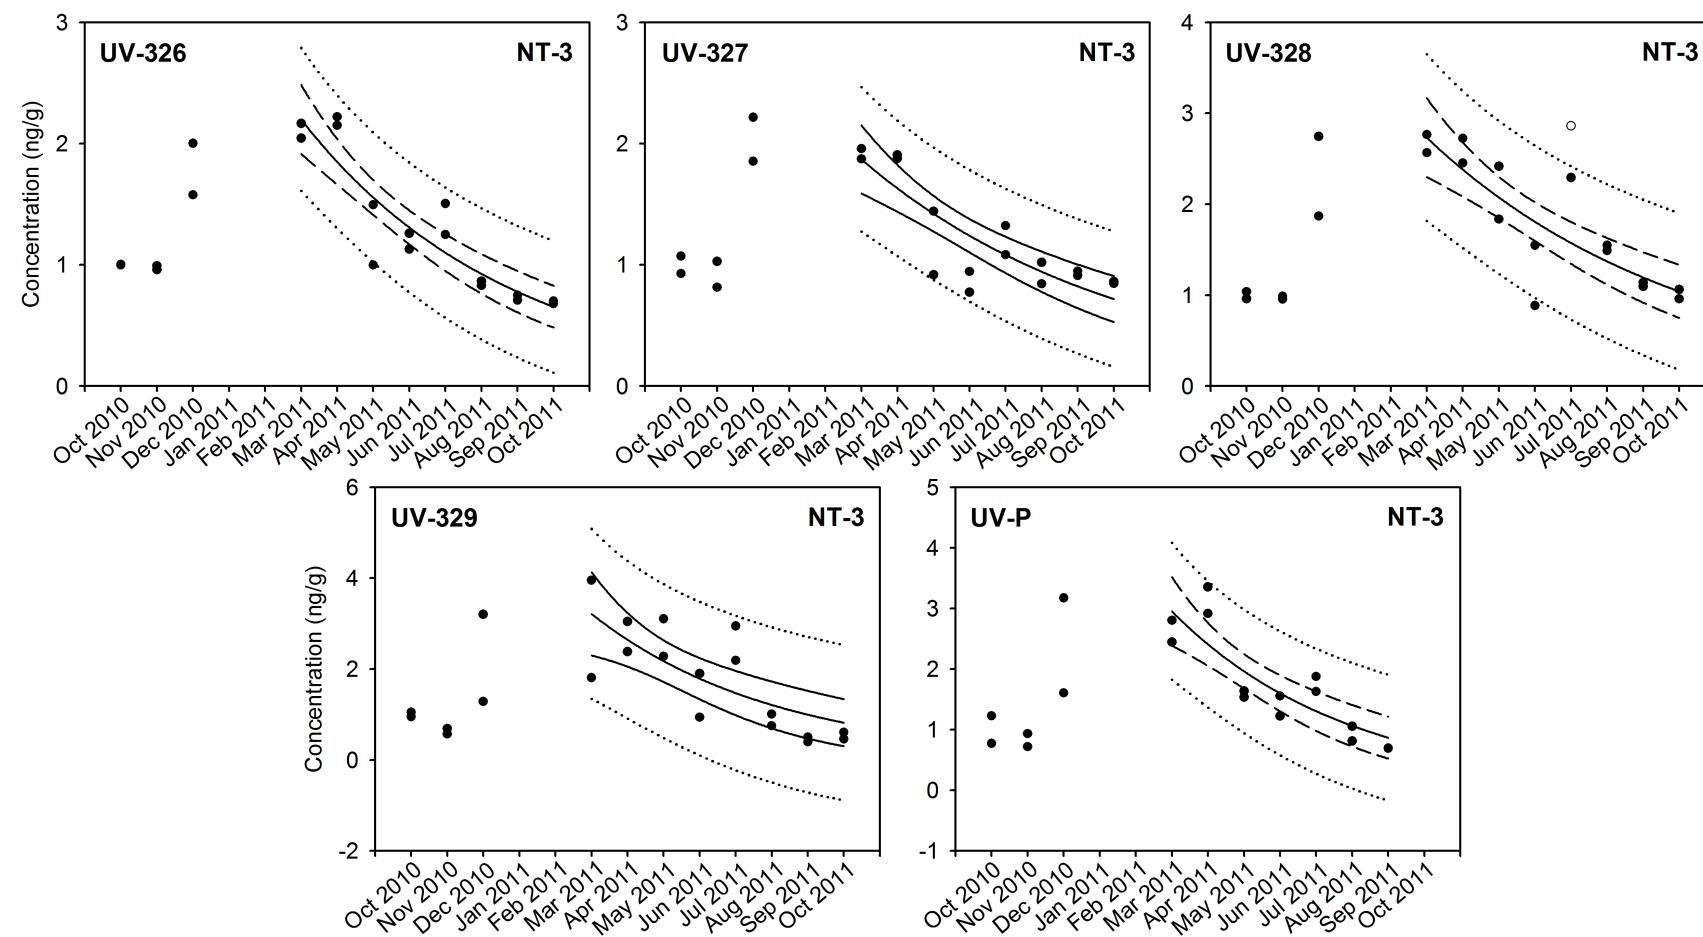

**Fig. S1** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT2 within one year (October 2010 to October 2011). OT2: 10 t/ha of biosolid applied in the plots every year since first application in October 2006.

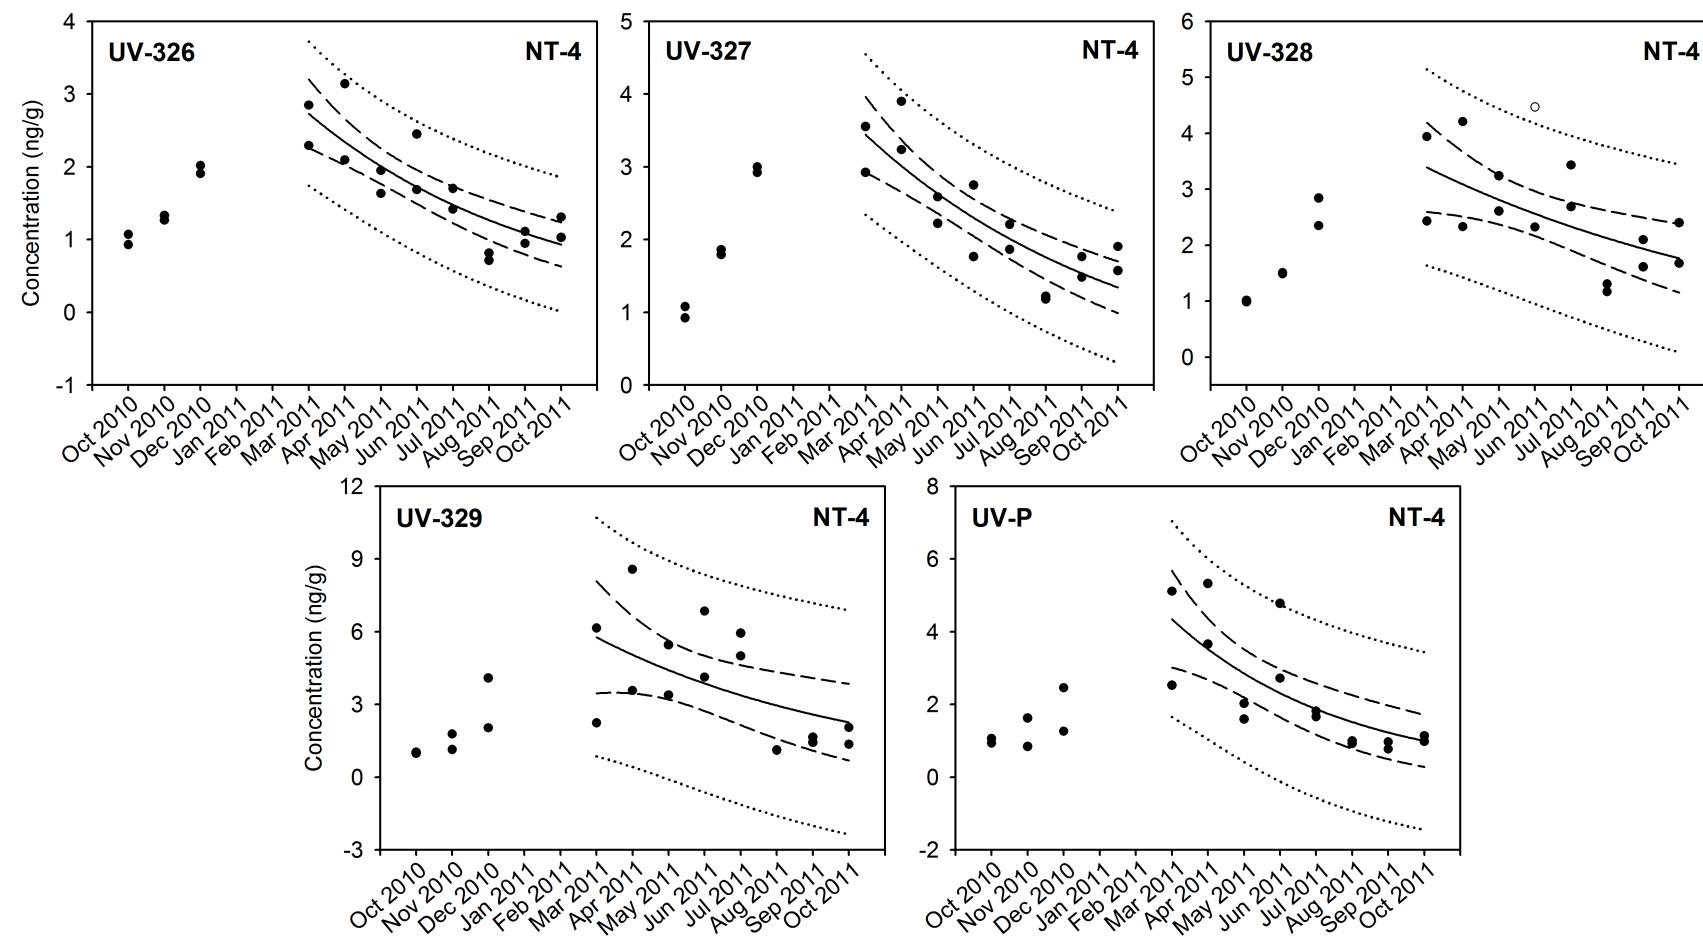

**Fig. S2** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT3 within one year (October 2010 to October 2011). OT3: 20 t/ha of biosolid applied in the plots every year since first application in October 2006.

**Fig. S3** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of OT4 within one year (October 2010 to October 2011). OT4: 40 t/ha of biosolid applied in the plots every year since first application in October 2006.

**Fig. S4** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of NT3 within one year (October 2010 to October 2011). NT3: 20 t/ha of biosolid applied once in October 2010.

**Fig. S5** Field dissipation of UV-326, UV-327, UV-328, UV-329 and UV-P in the biosolid-amended soils of NT4 within one year (October 2010 to October 2011). NT4: 40 t/ha of biosolid applied once in October 2010.

**Table S1.** Characteristic ions and retention times for target compounds in GC-MS.

Compound	M.W.	R.T.	Ions <sup>a</sup>		
Chrysene-d12 (IS)	240	12.510	<b>240</b>	236	241
