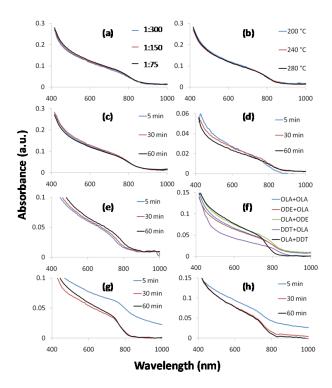

Fig. S1. UV-Vis spectra of (a) different precursors to OLA ratios (CIS1, CIS2 & CIS3), (b) different growth temperature (CIS2, CIS4 & CIS5), (c-e) CIS2, CIS1 & CIS4 analysed during the reaction at different time intervals to monitor the progress of reaction (f) different capping agents (CIS2, CIS6, CIS7, CIS8 and CIS9), (g & h) CIS9, CIS8 samples analysed at different time intervals during reaction.
