

Twin arginine translocase pathway and fast-folding lipoprotein biosynthesis in *E. coli*: interesting implications and applications

Hamsanathan Shruthi, Prakash Anand, Vadivel Murugan and Krishnan Sankaran*

Supplementary Fig. Radioactivity associated with EGFP bands in modified Tricine-SDS PAGE: The release of ester-linked radioactive palmitate □ upon alkali hydrolysis of EGFP bands is significant only in EGFP-TL, while the remaining radioactivity still associated with the band is mainly due to amino-linked palmitate ■
